ACKNOWLEDGEMENT

First and foremost I thank Almighty God for His blessings to complete this thesis successfully.

Words fail to express my profound sense of gratitude to my esteemed guide Prof. Dr. V.S. Jayakumar, Head of the Department of Physics, Mar Ivanios College, Thiruvananthapuram, for generously sharing his scientific experience, which has permitted me to improve my skills while allowing the progressive development of my autonomy. Moreover, I thank him for his persistent support, and for being gifted with a firm enthusiasm and a solid optimism which really help to transform even the hard work an enjoyable experience.

It is also a real pleasure for me to thank Dr. I. Hubert Joe, Department of Physics, Mar Ivanios College, Thiruvananthapuram, aside from his outstanding ability to suggest, direct and organize future research work, I am grateful to him for having closely followed my activity, thus allowing me to benefit from his experience and knowledge.

I am grateful to Rev. Fr. M.G. Mathew Manakarakavil, Principal, Mar Ivanios College, Thiruvananthapuram for his assistance in completing this work. I would like to thank Rev. Fr. Dr. Samuel Kattukallil, former Principal, Mar Ivanios College, Thiruvananthapuram for his help and support.

I am extremely grateful to Mrs. Rajalekshmi Gopakumar, the Manager, V.P.S H.S.S for Boys, Venganoor for allowing me to do this research work. I would like to thank Mr. S.P. Gopakumar for his kind support and encouragement are gratefully acknowledged.

I would like to thank Mr. N. Narayanan Nair, Principal, V.P.S H.S.S for Boys, Venganoor and Mrs. B. Lilly Paul, former Principal, V.P.S H.S.S for Boys, Venganoor for their continuous patronage and help throughout this work.

I thank Dr. J. Binoy, Research Scholar, Department of Physics, Mar Ivanios College, Thiruvananthapuram, who has always been generous in sharing his time in plenty of stimulating scientific discussions, and whose experimental support has been always at hand. It is my duty to acknowledge Mr. T. Vijayakumar, Research Scholar, Department of Physics for his sincere cooperation and lively discussions. My Special thanks to Mr. Jose P. Abraham, Research Scholar for his help and initial assistance in using Gaussian software. I would like to thank Mr. C. James, Research Scholar, for his valuable help, encouragement and support. I am grateful to Mr. C. Ravikumar, Research Scholar, for his valuable help, encouragement.
I wish extend few words on the colleagues who have shared with me the PhD experience. The peculiar mix of friendship and professional collaboration which I have been establishing with them, particularly with the members of my research group, is a very important part of the human experience I have gone through during the last years. It has been a real pleasure to work among these people.

I am grateful to Dr. Jacek Zaleski, Institute of Chemistry, University of Opole, Olesksa 48, 45-052 Opole, Poland, Dr. G. R. Pettit, Cancer Research Institute and Department of Chemistry, Arizona State University Tempe (Arizona 85287, USA) and Dr. A. Fischer, Inorganic Chemistry, Royal Institute of Technology, 10044, Stockholm, Sweden for providing me with some of samples used in this research work. Special thanks to Prof. Dr. O. Faurskov Nielsen, Department of Chemistry, University of Copenhagen, 5-Universitetsparken, DK-2100, Copenhagen, Denmark, Prof Dr. Jean. Aubard, ITODYS, Universit´e Paris VII, 1 rue Guy de la Brosse, 75005 Paris, France and Prof.Dr M.Manfait, Prof.Dr. G.D.Sockalingum, Unité MéDIAN, Université de Reims Champagne-Ardenne, CNRS UMR 6142, UFR de Pharmacie, 51 rue Cognacq-Jay, 51096 Reims cedex, France for their kind assistance in spectra recording and for fruitful discussions.

I would like to thank Dr.V.B.Kartha, Dr.C.Murali Krishna and Miss.N.B. Prathima, Center for Laser Spectroscopy, Manipal Academy of Higher Education, Manipal, India for their kind assistance in recording the Raman and SERS spectra of some of the samples. Special thanks to m/s Bruker Optics, Germany for recording some of the spectra.

My parents have always encouraged me and supported me to go as far as we wanted to up the educational ladder. This is something I shall always be grateful to them for. I would also like to acknowledge my parents in law and brother in law for their help and the support they have shown me in my studies.

I would like to thank my brother Mr. D.I. Saiju for his help in all computer related work. The kind and loving hospitality shown my guide Dr. V. S. Jayakumar and all his family members are gratefully acknowledged.

Lastly, but not leastly, I would like to acknowledge the help and the support of my partner in life, my loving wife S. L. Selin and our two lovely children whose presence in my life reminded me that no matter how important chemistry is, there are much more important things in life. In doing this, it is they who have kept me sane, while working on this thesis.

7th December 2007

D. SAJAN
