ACKNOWLEDGEMENT

The author is extremely grateful to his beloved supervisor, Dr. K. Subramanian, Professor and Head of Civil Engineering, Coimbatore Institute of Technology, Coimbatore, for suggesting this area of research and his remarkable supervision, advice, guidance, and unflinching encouragement in various ways.

He expresses his deep gratitude to the management, Principal, and Head of Department of Civil Engineering of PSNA College of Engineering and Technology, Dindigul, for granting him permission and providing facilities for carrying out this research. The Principal and the management of Coimbatore Institute of Technology, Coimbatore are to be particularly thanked for providing all the facilities, in carrying out and completing this work.

The author is thankful to his doctoral committee members Dr. P. Parameswaran and Dr. C. Natarajan, for their deep involvement in this work and their kind suggestions. He is immensely thankful to Dr. V.G. Srisanthi, in-charge of Structural Engineering Lab., Coimbatore Institute of Technology, Coimbatore for her kind suggestions.

The author’s father J. Chandrasekaran and mother C. Manorama deserve special mention for their inseparable support and prayers. He expresses his appreciation to his wife G. Niranjana whose dedication, love, and persistent confidence in him, has taken the load off his shoulder. Finally, the author specially thanks his friends, S. Saravanam, K. Parthiban, and R. Vignesh, for their dedicated involvement and support during this work.
