

LIST OF TABLES

Page No.

Table 1	Purification of xylose isomerase from <i>Cereus pterogonus</i> .	I
Table 2	Purification of xylose isomerase from <i>Opuntia vulgaris</i> .	I
Table 3	Effect of divalent cations on <i>Cereus pterogonus</i> xylose isomerase T ₈₀ isoform.	II
Table 4	Effect of divalent cations on <i>Opuntia vulgaris</i> xylose isomerase T ₉₀ isoform.	III
Table 5	Effect of protein denaturants on <i>Cereus pterogonus</i> xylose isomerase T ₈₀ isoform.	IV
Table 6	Effect of protein denaturants on <i>Opuntia vulgaris</i> xylose isomerase T ₉₀ isoform.	V
Table 7	Comparison of Kinetic constants for CPXI and OVXI isoforms.	VI
Table 8	CPXI T ₈₀ isoform denaturation rate constants (k).	VII
Table 9	OVXI T ₇₀ isoform denaturation rate constants (k).	VII
Table 10	OVXI T ₉₀ isoform denaturation rate constants (k).	VIII
Table 11	Calculated Free energy changes (ΔG) for CPXI T ₈₀ isoforms at different temperatures in presence of divalent cations.	VIII
Table 12	Calculated Free energy changes (ΔG) for OVXI T ₇₀ isoforms at different temperatures in presence of divalent cations.	IX
Table 13	Calculated Free energy changes (ΔG) for OVXI T ₉₀ isoforms at different temperatures in presence of divalent cations.	IX
Table 14	Calculated activation energy (E _a) for OVXI and CPXI isoforms at different temperatures in presence of divalent cations.	X
Table 15	Calculated Enthalpy (ΔH) for CPXI (T ₈₀ isoform) at different temperatures in presence of divalent cations.	X
Table 16	Calculated Enthalpy (ΔH) for OVXI (T ₇₀ isoform) at different temperatures in presence of divalent cations.	XI
Table 17	Calculated Enthalpy (ΔH) for OVXI (T ₉₀ isoform) at different temperatures in presence of divalent cations.	XI

Table 18	Calculated Entropy (ΔS) for CPXI (T_{80} isoform) at different temperatures in presence of divalent cations.	XII
Table 19	Calculated Entropy (ΔS) for OVXI (T_{70} isoform) at different temperatures in presence of divalent cations.	XII
Table 20	Calculated Entropy (ΔS) for OVXI (T_{90} isoform) at different temperatures in presence of divalent cations.	XIII
Table 21	Hyperfine (A) and g-value of Mn^{2+} and Co^{2+} detected by X-band EPR analysis in CPXI and OVXI samples.	XIV
Table 22	ICP-AES analysis of soil, water, cladode homogenate and ammonium sulphate for the quantitative determination of elements in the samples.	XV
