The author feels extremely grateful to Dr. M.R. RAGHAVACHAR for his able and valuable guidance and useful discussions at every stage of the work reported in this thesis. His constant encouragement and persistent efforts to instil interest in the subject have been of immense value to her.

The author wishes to extend her thanks to the Director, Madras University Post Graduate Centre, coimbatore for his encouragement.

She takes this opportunity to express her indebtedness to Dr. D. Somasundaram, Head of the Department of Applied Mathematics, for his extreme kindness and providing all possible facilities in the department. She also expresses her sincere thanks to other faculty members in the department for their encouragement.

She is highly thankful to Prof. D.K.P. Varadarajan, Principal, P.S.G. College of Arts and Science for initiating her into the Research work. Her thanks are also due to management of P.S.G. College of Arts and Science for providing the available facilities during her stay in that institution, where the author spent nearly two years of her research career under the guidance of Dr. M.R. Raghavachar, then P.G. Professor and Head of the Department of Mathematics.
She records her thanks to the authorities of the institutions I.I.Sc., Bangalore, and I.I.T., Madras for permitting her to avail computer facilities.

The author wishes to express her gratitude to Messrs. Dr. R. Krishnaswamy, K. Ponnuswamy, G.S. Singh and M. Kannan for their kind help in computer programming.

She deems it a pleasure to thank her colleagues of the department, her friends and well-wishers for their full co-operation and kind help.

The author gratefully acknowledges the award of a fellowship by C.S.I.R., New Delhi, from December 1977 which enabled her to complete the thesis.

Finally, the author expresses her thanks to Mr. A.S. Pandian who typed the thesis neatly and to Mr. R. Elangovan for his kind assistance in typing the mathematical symbols. Thanks are due to Mr. M. Solaiappan for his neat drawing.
