

LIST OF TABLES

Table 3.1. Ten most common ethnomedicinal plants used by the Irulas of NBR	31
Table 3.2. Presence/absence of phytoconstituents of medicinal plant species	32
Table 4.1. Species diversity index in various habitats of the NBR.	47
Table 4.2. Species richness of plants in various habitats of the NBR.	47
Table 4.3. Density of plants recorded in various habitats of the NBR.	48
Table 4.4. Abundance, density, basal area and IVI of trees in the moist deciduous forests.	56
Table 4.5. Frequency, abundance, density and IVI of shrubs in the moist deciduous forests.	57
Table 4.6. Frequency, abundance, density and IVI of herbs in the moist deciduous forests.	58
Table 4.7. Regeneration of trees in the moist deciduous forests.	59
Table 4.8. Density, basal area and IVI of medicinal trees in the dry deciduous forests.	69
Table 4.9. Abundance, density and IVI of medicinal shrubs in the dry deciduous forests.	70
Table 4.10. Abundance, density and IVI of medicinal herbs in the dry deciduous forests.	71
Table 4.11. Regeneration status of medicinal trees in the dry deciduous forests.	72
Table 4.12. Abundance, density, basal area and IVI of medicinal trees in the riverine forests.	77
Table 4.13. Abundance, density and IVI of shrubs in the riverine forests.	79
Table 4.14. Abundance, density and IVI of medicinal herbs in the riverine forests.	80
Table 4.15. Regeneration of medicinal plants in the riverine forests (Density/ha).	81
Table 4.16. Frequency, abundance, density, basal area and IVI of trees in the teak plantations	87
Table 4.17. Frequency, abundance, density and IVI of shrubs in the teak plantations.	87
Table 4.18. Frequency, abundance, density and IVI of medicinal herbs in the teak plantations.	88
Table 4.19. Regeneration status of medicinal plants in the teak plantations.	89
Table 4.20. Density of endemic medicinal plants in the NBR.	91
Table 5.1. Commercially exploited medicinal plants recorded in the NBR during this study.	110
Table 5.2. Dominant families of commercially exploited medicinal plant species.	110
Table 5.3. Distribution of commercially exploited medicinal plant species in different habitats.	112
Table 5.4. Medicinal plants sold in the market at Poondi.	113
Table 5.5. Tree species richness and diversity in the least-harvested and harvested habitats.	141
Table 5.6. Density, basal area and IVI of important trees in the least-harvested and harvested habitats.	141
Table 5.7. Abundance, density and IVI of important medicinal shrubs in the least-harvested and harvested habitats.	144
Table 5.8. Abundance, density and IVI of important medicinal herbs in the least-harvested and harvested habitats.	145
Table 5.9. Density of commercially exploited medicinal plants in the NBR.	153
Table 6.1. Tree species richness and diversity index in the less and severely burnt area.	170
Table 6.2. Tree density in the less and severely burnt area.	173
Table 6.3. Abundance, density, basal area and IVI of tree species in the less burnt (LB) and severely burnt (SB) areas.	175
Table 6.4. Abundance, density and IVI of medicinal shrubs in the less burnt (LB) and severely burnt (SB) habitats.	178
Table 6.5. Abundance, density and IVI of herbs in the less burnt and severely burnt areas.	179
Table 6.6. Density/ha of medicinal seedlings and saplings in the less and severely burnt areas.	181
