ACKNOWLEDGEMENT

I express my deep sense of gratitude to my respected guide, Dr. M. D. Kannan, Lecturer (Senior Grade), Department of Physics, PSG College of Technology, Coimbatore for his able guidance and valuable advice throughout the course of my research. His strong will, untiring patience, perfection and extremely understanding nature have really been the constant encouraging factors. He wielded the essential goal at the right junctures without attempting to cramp my natural ways of working and thinking. I am deeply indebted to him for all these and more.

I wish to express my gratefulness to the Principal and the Management, PSG College of Technology, Coimbatore for their continuous support and encouragement. I am also happy to express my heartfelt thanks to Dr. S. Jayakumar, Head Incharge, Department of Physics, PSG College of Technology, Coimbatore for his sustained encouragement, timely advices and helpful suggestions besides useful discussions throughout my course of study.

With pride and pleasure I seize this opportunity to thank Dr. M. S. Vijaya, former Professor and Head, Department of Physics, PSG College of Technology, Coimbatore for her motherly care, blessings and advices throughout the course of my work.

I am very much indebted to University Grants Commission (UGC), Government of India for providing me an opportunity to work as Project Fellow in the Major Research Project Scheme and Council of Scientific and Industrial Research (CSIR) for awarding me the Senior Research Fellowship to pursue my research.
It's my duty to record my sincere thanks to Dr. Parvathy Ramasamy, Scientist, Central Power Research Institute (CPRI), Bangalore and Dr. C. Sanjeeviraja, Head of the Department of Physics, Alagappa University, Karaikudi for extending their facilities for composition and photoconduction studies.

I wish to acknowledge Dr. P. Gopalakrishnan, Head Incharge, Department of Metallurgical Engineering, PSG College of Technology, Coimbatore for his help in surface morphological studies.

I am very grateful to Dr. R. Rudra Moorothy, Head, School of Energy and Mr. B. Giriraj, Lecturer, Department of Mechanical Engineering, PSG College of Technology, Coimbatore for their encouragement throughout the course of my work.

I am fortunate to have received unending encouragement, comments, and suggestions from Mrs. Joyraju and Mr. Eugene Santiago. They have been generous in going meticulously through the manuscript of the thesis and made the presentation language both spontaneous and extensive. My special thanks are due to Mr. S. Agilan and colleagues, Department of Physics, Coimbatore Institute of Technology, Coimbatore for their timely help during the course of my work.

Words are inadequate to record my heartfelt thanks to Dr. M. Dhanam, my senior co-research worker for her sustained encouragement and valuable suggestions. I am highly thankful to Dr. R. Amuda, Dr. S. Senthilnathan, Messrs M. Venkatachalam, M. Sivakumar, A. V. Gunasekaran, P. Ramanathaswamy, N. Hariharavenkatraman, K. Kandavel, S. Senthilarasu, D. Raja, R. Anandkumar, S. Arul and B. Satish for their valuable suggestions, warm support and timely advice throughout the course of my work.
I take this opportunity to thank all the faculty members of the Department of Physics, PSG College of Technology, for their kind encouragement and support.

I also thank all the non-teaching staff members of the Department of Physics, PSG College of Technology, Coimbatore for their kind help and cooperation.

My sincere thanks are also due to M/s. Sigma Computers, PSG Tech Campus, Coimbatore for their untiring help in typing the thesis.

Completing a challenging endeavour of this kind is impossible without the support of my loved ones Appa, Amma and Karthi. I am deeply indebted to them for this and much more.

R.BALASUNDARAPRABHU
