APPENDIX : 4
USER GUIDE

System Requirements:

1. Windows-95 based PC system with a minimum speed of 100 MHZ
3. 32 bit Monitor (Colour preferred)
4. CD – Drive

Installation of the Programme:

1. Turn the power on.
2. Insert the given CD in the CD-Drive.
3. Click the “start” Menu and explore the CD, using Windows Explorer.
4. In the Explorer section, choose setup, and double click it
5. Now, the Windows will automatically process the installation.
6. While installing the programme, there is a question for change in directory. If you wish to change the directory, click the command, enter the directory you want and click the tag in the upside of the left hand corner.
7. If you do not wish to change the directory, then directly click the tag in the upside of the left hand corner.
8. Now setup will show celldata. Setup is completed successfully after few minutes.
9. Return to the “start” Menu.

To Run the Programme:

1. Click the “start” Menu.
2. Click “Programmes”.
3. In the Programme you will find “celldata” and click it.
4. Now the programme will open.

Student’s Session:

1. Enter the name and click the module assigned to you, click “start”.
2. Then the programme will be run as per the topic allotted by the teacher.
3. Use the programme as per the instruction given in the screen.
4. Questions will be executed after each frame. Students can’t go to the next frame in drill & practice until they answer correctly to the questions.
5. In the completion of the last frame, the dialogue “Do you want to revise it again” will be executed. Click “yes” if you want it again or click “No”.
