ACKNOWLEDGEMENTS

First and foremost, I am truly indebted to my supervisor, Prof. P.R. Bhanu Murthy, Director of Evaluation, JNTU Anantapur, Anantapur who has provided an excellent study and work environment. From the beginning of my studies and research to the completion of this thesis, he has proposed countless suggestions. He was always there to listen and to give advice. His wide knowledge and his logical way of thinking have been of great value for me. Not only was he readily available for me, as he so generously is for all of his students, but he always read and responded to the drafts of each chapter of my work more quickly than I could have hoped. Although he is not a man of many words, his oral and written comments are always extremely perceptive, helpful, and appropriate. I am deeply grateful to my supervisor.
