ACKNOWLEDGEMENT

I feel a great contentment to express my heartiest venerations and heartful gratitude to my learned teacher and dignified chairman Dr. R.P. Kaushik, Senior Rice Breeder-cum-Scientist Incharge, RWRC, Malan (Kangra) who through his constructive criticism and constant advice nourished my interest in the subject and provided a free pleasant atmosphere to work. It would have been impossible for me to present this thesis without his outstanding supervision. I fall short of words to express my gratitude towards him. I shall ever remain indebted to him for his benevolence and affection.

I sincerely extend my loyal and ardent thanks to Dr. B.C. Sood (Prof. & Head, Dept. of Plant Breeding and Genetics), Dr. Rajeev Rathour (Assistant Scientist, ACHBB), Dr. (Mrs.) Kamal Mohini (Assoc. Prof., Biochemistry) and Dr. K.K. Katoch (Director Extension), the esteemed members of my Advisory Committee for their cordial cooperation, valuable guidance and fruitful suggestions throughout the tenure of this study.

I convey my thanks to Dr. Pradeep K. Sharma, Dean, Postgraduate Studies for providing necessary facilities and help during the course of investigation.

My thanks are also due to all the members of faculty, laboratory, field and ministerial staff of Department of Plant Breeding and Genetics, Palampur, Rice and Wheat Research Centre, Malan and Advanced Centre of Hill Bioresources and Biotechnology for the help rendered by them.

Candid thanks are due to amaranthus love and unabated moral support received from my friends and colleagues, whose collective efforts have been reflected in the completion of this venture.

Every effort motivated by an ambition has an inspiration behind it. I owe this proud place to my affectionate parents and buji who encourage me to undergo higher studies. Their selfless persuasion and sacrifices, heartfelt blessings, everlasting love and firm faith has made this manuscript a remuneration to translate their dream into a reality.

I am also indebted to my little daughter Manavi, whose love is the basis of my sole optimism. Her innocent chirpings and queries remained an instant paragon.

Words are no enough to express my unboundful gratitude to my husband Dr. Shailender Kumar for his moral support and constant inspiration which enabled me to reach the foot step of my long cherished aspiration.

I express my deep gratitude for the help, love and support of my bhaiya, bhabhi, Ekta and Sanjeev who boosted me up morally and cheered me in periods of mental stress and strains. I am conscious to express my gratitude to my parents-in-laws and all relatives for their heartiest blessings.

Mr. Ajay Walia deserve special thanks for his untiring efforts in bringing the manuscript to this form.

Needless to say errors and omissions are mine.
