</table>
6.1 Mean and Standard Deviation in Independence (Family Environment) of the groups who possess differential language skills among the selected Engineering Students

6.2 Mean Score difference in Independence (Family Environment) between the groups who possess differential language skills among the selected Engineering Students

7.1 Mean and Standard Deviation in Active recreational orientation (Family Environment) of the groups who possess differential language skills among the selected Engineering Students

7.2 Mean Score difference in Active recreational orientation (Family Environment) between the groups who possess differential language skills among the selected Engineering Students

8.1 Mean and Standard Deviation in Organization (Family Environment) of the groups who possess differential language skills among the selected Engineering Students

8.2 Mean Score difference in Organization (Family Environment) between the groups who possess differential language skills among the selected Engineering Students

9.1 Mean and Standard Deviation in Control (Family Environment) of the groups who possess differential language skills among the selected Engineering Students

9.2 Mean Score difference in Control (Family Environment) between the groups who possess differential language skills among the selected Engineering Students

10.1 Mean and Standard Deviation in Family Environment (General) of the groups who possess differential language skills among the selected Engineering Students

10.2 Mean Score difference in Family Environment (General) between the groups who possess differential language skills among the selected Engineering Students

11.1 Mean and Standard Deviation in Campus Environment (College Environment) of the groups who possess differential language skills among the selected Engineering Students
11.2 Mean Score difference in Campus Environment (College Environment) between the groups who possess differential language skills among the selected Engineering Students

12.1 Mean and Standard Deviation in Managerial Environment (College Environment) of the groups who possess differential language skills among the selected Engineering Students

12.2 Mean Score difference in Managerial Environment (College Environment) between the groups who possess differential language skills among the selected Engineering Students

13.1 Mean and Standard Deviation in Academic Environment (College Environment) of the groups who possess differential language skills among the selected Engineering Students

13.2 Mean Score difference in Academic Environment (College Environment) between the groups who possess differential language skills among the selected Engineering Students

14.1 Mean and Standard Deviation in Peer Group Environment (College Environment) of the groups who possess differential language skills among the selected Engineering Students

14.2 Mean Score difference in Peer Group Environment (College Environment) between the groups who possess differential language skills among the selected Engineering Students

15.1 Mean and Standard Deviation in Faculty Environment (College Environment) of the groups who possess differential language skills among the selected Engineering Students

15.2 Mean Score difference in Faculty Environment (College Environment) between the groups who possess differential language skills among the selected Engineering Students

16.1 Mean and Standard Deviation in College Environment (General) of the groups who possess differential language skills among the selected Engineering Students

16.2 Mean Score difference in College Environment (General) between the groups who possess differential language skills among the selected Engineering Students
17.1 Mean and Standard Deviation in Self-confidence (Personality Traits) of the groups who possess differential language skills among the selected Engineering Students

17.2 Mean Score difference in Self-confidence (Personality Traits) between the groups who possess differential language skills among the selected Engineering Students

18.1 Mean and Standard Deviation in Persistence (Personality Traits) of the groups who possess differential language skills among the selected Engineering Students

18.2 Mean Score difference in Persistence (Personality Traits) between the groups who possess differential language skills among the selected Engineering Students

19.1 Mean and Standard Deviation in Co-operativeness (Personality Traits) of the groups who possess differential language skills among the selected Engineering Students

19.2 Mean Score difference in Co-operativeness (Personality Traits) between the groups who possess differential language skills among the selected Engineering Students

20.1 Mean and Standard Deviation in Emotional Stability (Personality Traits) of the groups who possess differential language skills among the selected Engineering Students

20.2 Mean Score difference in Emotional Stability (Personality Traits) between the groups who possess differential language skills among the selected Engineering Students

21.1 Mean and Standard Deviation in Emotional Control (Personality Traits) of the groups who possess differential language skills among the selected Engineering Students

21.2 Mean Score difference in Emotional Control (Personality Traits) between the groups who possess differential language skills among the selected Engineering Students

22.1 Mean and Standard Deviation in Sense of Responsibility (Personality Traits) of the groups who possess differential language skills among the selected Engineering Students
22.2 Mean Score difference in Sense of Responsibility (Personality Traits) between the groups who possess differential language skills among the selected Engineering Students

23.1 Mean and Standard Deviation in Courtesy (Personality Traits) of the groups who possess differential language skills among the selected Engineering Students

23.2 Mean Score difference in Courtesy (Personality Traits) between the groups who possess differential language skills among the selected Engineering Students

24.1 Mean and Standard Deviation in Sociability (Personality Traits) of the groups who possess differential language skills among the selected Engineering Students

24.2 Mean Score difference in Sociability (Personality Traits) between the groups who possess differential language skills among the selected Engineering Students

25.1 Mean and Standard Deviation in Leadership (Personality Traits) of the groups who possess differential language skills among the selected Engineering Students

25.2 Mean Score difference in Leadership (Personality Traits) between the groups who possess differential language skills among the selected Engineering Students

26.1 Mean and Standard Deviation in Initiative (Personality Traits) of the groups who possess differential language skills among the selected Engineering Students

26.2 Mean Score difference in Initiative (Personality Traits) between the groups who possess differential language skills among the selected Engineering Students

27.1 Mean and Standard Deviation in Attitude towards life (Personality Traits) of the groups who possess differential language skills among the selected Engineering Students

27.2 Mean Score difference in Attitude towards life (Personality Traits) between the groups who possess differential language skills among the selected Engineering Students
28.1 Mean and Standard Deviation in Attitude towards self (Personality Traits) between the groups who possess differential language skills among the selected Engineering Students

28.2 Mean Score difference in Attitude towards self (Personality Traits) between the groups who possess differential language skills among the selected Engineering Students

29.1 Mean and Standard Deviation in Home Environment and Planning of work (Study Habits) of the groups who possess differential language skills among the selected Engineering Students

29.2 Mean Score difference in Home Environment and Planning of work (Study Habits) between the groups who possess differential language skills among the selected Engineering Students

30.1 Mean and Standard Deviation in Reading and Note taking (Study Habits) of the groups who possess differential language skills among the selected Engineering Students

30.2 Mean Score difference in Reading and Note taking (Study Habits) between the groups who possess differential language skills among the selected Engineering Students

31.1 Mean and Standard Deviation in Planning of Subjects (Study Habits) of the groups who possess differential language skills among the selected Engineering Students

31.2 Mean Score difference in Planning of Subjects (Study Habits) between the groups who possess differential language skills among the selected Engineering Students

32.1 Mean and Standard Deviation in Habits of Concentration (Study Habits) of the groups who possess differential language skills among the selected Engineering Students

32.2 Mean Score difference in Habits of Concentration (Study Habits) between the groups who possess differential language skills among the selected Engineering Students

33.1 Mean and Standard Deviation in Preparation for Examination (Study Habits) of the groups who possess differential language skills among the selected Engineering Students
33.2 Mean Score difference in Preparation for Examination (Study Habits) between the groups who possess differential language skills among the selected Engineering Students

34.1 Mean and Standard Deviation in General Habits and Attitudes (Study Habits) of the groups who possess differential language skills among the selected Engineering Students

34.2 Mean Score difference in General Habits and Attitudes (Study Habits) between the groups who possess differential language skills among the selected Engineering Students

35.1 Mean and Standard Deviation in College Environment (Study Habits) of the groups who possess differential language skills among the selected Engineering Students

35.2 Mean Score difference in College Environment (Study Habits) between the groups who possess differential language skills among the selected Engineering Students

36.1 Mean and Standard Deviation in Study Habits (General) of the groups who possess differential language skills among the selected Engineering Students

36.2 Mean Score difference in Study Habits (General) between the groups who possess differential language skills among the selected Engineering Students

37.1 Mean and Standard Deviation in Locus of Control of the groups who possess differential language skills among the selected Engineering Students

37.2 Mean Score difference in Locus of Control between the groups who possess differential language skills among the selected Engineering Students

38.1 Mean and Standard Deviation in Independent (Students’ Learning Style) of the groups who possess differential language skills among the selected Engineering Students

38.2 Mean Score difference in Independent (Students’ Learning Style) between the groups who possess differential language skills among the selected Engineering Students
39.1 Mean and Standard Deviation in Avoidant (Students’ Learning Style) of the groups who possess differential language skills among the selected Engineering Students

39.2 Mean Score difference in Avoidant (Students’ Learning Style) between the groups who possess differential language skills among the selected Engineering Students

40.1 Mean and Standard Deviation in Collaborative (Students’ Learning Style) of the groups who possess differential language skills among the selected Engineering Students

40.2 Mean Score difference in Collaborative (Students’ Learning Style) between the groups who possess differential language skills among the selected Engineering Students

41.1 Mean and Standard Deviation in Dependent (Students’ Learning Style) of the groups who possess differential language skills among the selected Engineering Students

41.2 Mean Score difference in Dependent (Students’ Learning Style) between the groups who possess differential language skills among the selected Engineering Students

42.1 Mean and Standard Deviation in Competitive (Students’ Learning Style) of the groups who possess differential language skills among the selected Engineering Students

42.2 Mean Score difference in Competitive (Students’ Learning Style) between the groups who possess differential language skills among the selected Engineering Students

43.1 Mean and Standard Deviation in Participative (Students’ Learning Style) of the groups who possess differential language skills among the selected Engineering Students

43.2 Mean Score difference in Participative (Students’ Learning Style) between the groups who possess differential language skills among the selected Engineering Students

44.1 Mean and Standard Deviation in Learning Style (General) of the groups who possess differential language skills among the selected Engineering Students
44.2 Mean Score difference in Learning Style (General) between the groups who possess differential language skills among the Engineering Students

45.1 Mean and Standard Deviation in Learning for Achievement (Approaches to Learning) of the groups who possess differential language skills among the selected Engineering Students

45.2 Mean Score difference in Learning for Achievement (Approaches to Learning) between the groups who possess differential language skills among the selected Engineering Students

46.1 Mean and Standard Deviation in Learning for Reproduction (Approaches to Learning) of the groups who possess differential language skills among the selected Engineering Students

46.2 Mean Score difference in Learning for Reproduction (Approaches to Learning) between the groups who possess differential language skills among the selected Engineering Students

47.1 Mean and Standard Deviation in Meaningful Learning (Approaches to Learning) of the groups who possess differential language skills among the selected Engineering Students

47.2 Mean Score difference in Meaningful Learning (Approaches to Learning) between the groups who possess differential language skills among the selected Engineering Students

48.1 Mean and Standard Deviation in Approaches to Learning of the groups who possess differential language skills among the selected Engineering Students

48.2 Mean Score difference in Learning Approaches (General) between the groups who possess differential language skills among the selected Engineering Students

49.1 Mean and Standard Deviation in Motivation to Learn (Learners’ Effectiveness) of the groups who possess differential language skills among the selected Engineering Students

49.2 Mean Score difference in Motivation to Learn (Learners’ Effectiveness) between the groups who possess differential language skills among the Engineering Students
50.1 Mean and Standard Deviation in Interest in Learning (Learners’ Effectiveness) of the groups who possess differential language skills among the selected Engineering Students

50.2 Mean Score difference in Interest in Learning (Learners’ Effectiveness) between the groups who possess differential language skills among the selected Engineering Students

51.1 Mean and Standard Deviation in Attitude towards Learning (Learners’ Effectiveness) between the groups who possess differential language skills among the selected Engineering Students

51.2 Mean Score difference in Attitude towards Learning (Learners’ Effectiveness) between the groups who possess differential language skills among the selected Engineering Students

52.1 Mean and Standard Deviation in Learning Goals defined (Learners’ Effectiveness of the groups who possess differential language skills among the selected Engineering Students

52.2 Mean Score difference in Learning Goals defined (Learners’ Effectiveness) between the groups who possess differential language skills among the selected Engineering Students

53.1 Mean and Standard Deviation in Attention (Learners’ Effectiveness) of the groups who possess differential language skills among the selected Engineering Students

53.2 Mean Score difference in Attention (Learners’ Effectiveness) between the groups who possess differential language skills among the selected Engineering Students

54.1 Mean and Standard Deviation in Discipline (Learners’ Effectiveness) of the groups who possess differential language skills among the selected Engineering Students

54.2 Mean Score difference in Discipline (Learners’ Effectiveness) between the groups who possess differential language skills among the selected Engineering Students

55.1 Mean and Standard Deviation in Perseverance (Learners’ Effectiveness) of the groups who possess differential language skills among the selected Engineering Students
55.2 Mean Score difference in Perseverance (Learners’ Effectiveness) between the groups who possess differential language skills among the selected Engineering Students

56.1 Mean and Standard Deviation in Memory (Learners’ Effectiveness) of the groups who possess differential language skills among the selected Engineering Students

56.2 Mean Score difference in Memory (Learners’ Effectiveness) between the groups who possess differential language skills among the selected Engineering Students

57.1 Mean and Standard Deviation in Learners’ Effectiveness (General) of the groups who possess differential language skills among the selected Engineering Students

57.2 Mean Score difference in Learners’ Effectiveness (General) between the groups who possess differential language skills among the Engineering Students
