Fighting the invisible - Graft

In this 20th century, we are facing and fighting against crores of invisible evils. Also we are not in the state of finding a solution to even one of these evils. But somehow we have to get rid of them. Otherwise GOD will destroy the world earlier, unable to bear these satanic doings. Corruption is the queen of these evils. Many scientists had discovered medicines for many diseases. But who will discover a medicine to corruption-an epidemic?

People working in each & every field have become addict to bribery. They are no longer better than drug addicts. Police Dept is the leading dept in bribery. People working in R.T.O. Office are considered as 'Corruption Ghosts'. Even the boy who gives token in the clinics get 'something' from a patient who is having the token numbered 12 and send him earlier. The people who are sitting there cannot do anything. The government employees show delay in their work. The persons whose files are to be passed give 'something' and get their work finished. Is it not to be felt ashamed?

The rich people can do as they like. They is no one to control them. Poor people who are living below the poverty line are treated as worse as an animal. Political leaders - M.L.A's & M.P's use their influence when they are guilty; Innocent people are being punished. What a pity! Even the educational institutions demand 'GRAFT' in the name of donation. The same students who had given the amount are writing articles under the topic 'GRAFT'. What a wonder!

Money has become the grandmaster and people, its slaves. In this electronic& computerized world there is no importance for people(or) their qualities. This is not the year for good things. Importance is given only for the property they posses; luxurious life they lead; Influence they have. Corruption has become one part of body for 90% people and it wil not vanish until the world vanishes. Till then we will fight against it!

SPECIMEN -2

The Invisible Germs

Introduction

The invisible germs are the minute micro organisms which can cause many
serious effects. (eg) virus, rabies etc. These germs may sometime cause fatal end. Not only the micro-organisms, there are some other invisible germs which can cause great disastrous, to the nation and the world. Here we can discuss about the evils of drinking. This is also a invisible germ which provides disgrace to the human being and also to his family members.

It is an accepted fact that drinking is an evil. Some adopt this habit under the mistaken notion that it helps one overcome depression, and others to enjoy the pleasure it gives. In modern age drinking is being viewed as a status symbol. The drunkard not only spolish himself, he also cause great havoc to his family members. He also influence the other people to be a prey to the drinking habit.

The person undertaken drinking habit was affected both mentally and physically. At the beginning it gives him pleasures but later, he became slave to this habit. Later, there may be doctor's report as such, his liver was damaged, his kidney does not work so on.

Childrens of those drunkard are not respectable and they also do not receive nutritious food. Both central and state government agree in principle that prohibition should be enforced throughout the country. The credit of ushering in the policy of prohibition in our country goes to our Bapuji.

Conclusion

India require some more Mahatma's to eradicate this invisible germs from our country. No doubt it is tough task, when we do it with sincerity and willfully we will succeed in our aim.

SPECIMEN - 3

Fighting the invisible

In our society, there are many social evils. Like Dowry system, Female infanticide, communalism, etc. This evils lead our people to violence. There is no peace in our world due to this evils. Dowry system is one of these evils.

The people don't want the female child due to the dowry. A girl child is burden to her parents till they get married. Due to this evil, many of the women got unmarried in this society. Because of this evil, the people kill the girl child. Being afraid of this dowry system, many of the people not even give birth to a girl child.
“Behind the victory of a man, there should be a woman”. A man should be respected by a society only by his wife. Nowadays, the young men forget this and only ill treat his wife. The woman is like an oar of the life boat of a man.

On knowing this also, the man only cares about the wealth, but not about her character and her knowledge. Many of the women were ill treated and they were insisted to commit suicide due to this social evil. Is there a history about “dowry burns” of the “young men”. It only burns the females and their hearts. The young man who got the dowry should be outlisted. They are worse than the robbers. They should be treated like a murderer. To abolish this evil we have to accept the education of the women, and each woman have the bravery in her to fight against this social evil.

SPECIMEN - 4

Fighting the invisible - female infanticide

To
C.V. Raman,
17, Raja Street,
India.

Dear Sir,

There are so many diseases in the world. Medicines have not been discovered to some of the diseases yet. In addition to these diseases social evils are also troubling us, Female infanticide is the most terrible thing. The dowry system is the root cause for this. Can you find a medicine for this critical disease?

Eagerly awaiting for the earliest discovery.

yours faithfully,

SPECIMEN - 5

Fighting the Invisible

To
Louis Pasteur,
Franco Prussion Street,
France.

Respected Sir,

The world knows, that you are the person, who found the medicine for
rabies disease. You are popularly known as the famous French scientist Louis Pasteur. Now, I need a treatment for our disease, i.e., religious quarrels and fight for the high post. I read that, you feel very sad, when you saw, the wounded boy Joseph. But if you come to our country, you can see many thousand Joseph's, and you may sink in the sorrow sea. So please help to find a medicine for our disease. When Gandhi lived, we did not need the medicine for this disease. But now we have to import from you. So please send it to us.

Yours sincerely,

SPECIMEN - 6

Fighting the Invisible

The Invisible thing which is fought here by me is the eroding of nature and the effects caused by it. It is a dialogue between me a student and the creator.

**Student**: In the beginning the world was rich in all its natural wealth. As days went by the wealth of nature started decreasing. Could you kindly say why it happened so?

**Creator**: I created the world in my best way. But it was you humans who started disturbing nature.

**Student**: It was you who gave the humans enough knowledge to think of improving their ways.

**Creator**: I did give knowledge but I gave it to be used in a better way.

**Student**: What do you think of the Green house effect? Well, I know it is due to over pollution. But why is pollution ever caused. The things created by you are to be used by us. Then why is pollution caused when we use it?

**Creator**: I did create nature to be used by one and all. But that's not the reason for pollution. The humans have begun to forget the ways of using the natural things.

**Students**: All say that invention of scientific things have resulted in pollution. Is it true.

**Creator**: It is somewhat true. It is because men try to dictate nature only by love this can be made well.

**Student**: Now just think of the shortage in food products. Why don't you help the humans in increasing the product.
**Creator** : Well I am helping. The scientists who invented the modern equipments, medicines etc are present here question them.

**student** : Okey now first let me ask Mr Pastor a question. Do you think that scientific developments are the secret agents of pollution?

**Pastor** : This is partially true and partially false. Not all inventions cause pollution. Like vehicles, machines etc.

**Student** : I think it would have been better if the world was just like the stone age.

**Pastor** : Then there would have been no difference between men and animals.

**Student** : Now Mr.Newton what do you think causes acid rain.

**Newton** : As Mr.Pastor said they are the vehicles which cause acid rain.

**Student** : Now they say that the trees should not be cut. Then how can, we get energy to carry on with our work. Only by burning it we get energy.

**Newton** : But now they have invented Solar energy also.

**Student** : There is an information that the sun too is polluted with carbon.

**Newton** : Yes, this is due to the increase in the carbon content in the Atmosphere.

**Student** : The developed countries like America contribute much to pollution. But they are still improving. Why so? America has used all the natural products. It is not wrong. Then why is it polluted.

**Newton** : You can’t say that they use the natural products properly. Some are wasted.

**Student** : Why is nature not able to over come or fight against the polluting agents and remain unpolluted.

**Einstein** : Upto a certain limit nature does try to overcome the polluting agents. But above a certain limit it fails.

**Student** : Is there no way to protect the world from the danger of pollution?

**Einstein** : “When there is a will there is a way ”. If man thinks that he should protect nature then it may be possible.

**Student** : Why can’t someone invent new methods of protecting nature? We can find methods of preventing smoke, dust etc.

**Einstein** : Surely man will attempt to find methods of preventing pollution.
As man invents a method for one problem another problem arises. Is there no method by which all the problems could be solved?

There may be a method. It is the responsibility of you people to find it.

Why is the ozone layer having holes?

It is because of the increasing carbon content.

I feel very scared when I think that each second this world of ours is polluted and is going to be destroyed.

There’s an end for everything and hence this pollution can also be ended up with little effort.

SPECIMEN 7

Fighting the invisible - Untouchability

In ancient times the people were divided into four groups on the basis of the work they do for living. There was not a place for the word caste in their dictionary. They saw God in every human being and respected each other. But as the time passed the minds of the humans got slowly poisoned. And so slowly the devil of untouchability developed his empire over the whole world and is ruling perfectly well.

In India especially in our state I feel that this devil actually lives. Here the untouchable people are not allowed to even the temples. Some certain area of the city or village is forbidden for them and they are supposed to live there only. They are living as slaves.

The great God Buddha said that the human beings are having the same features such as the outward appearance and the colour of the blood. He preached this wherever he went. But the people don’t realize it. Mahatma Gandhi gave the wonderful name ‘Harijan’, meaning the children of God, who are supposed to be the untouchables. The Government also take proper steps.

The present acts of the Government give facility for them to come out bright in their life. The Government reserves a proper % of seats in the colleges in the hope of argumenting the uplift of untouchables. The higher castes do not realize this and they blame the Government.

Any how to make the people free from the handcuffs of the devil of untouchability a medicine something like vaccines should be invented.
SPECIMEN 8

Fighting the invisible

In India there are number of problems. The most important one is dowry system. It affects the ladies of this society. The bride groom whose parent was not able to give dowry was killed in her husband’s house by stove burst. My cousin, her name is Kalpana also killed by her mother-in-law in Karur. This incident took place before 10 years. After this 10 years there is no change in this situation. It still continuous. We are walking towards the 21th century and this situation is a draw back in our country’s progression.

Due to this dowry the poor parents hate their girls. And they don’t like to give birth a girl baby. They only want boys. So, they want to kill their girl baby. The Mother of that baby also wants to do it. And this takes place in Salem District frequently. Thus a single problem consists of so many problems and at last it would became very a big problem. At that time we should not have any idea to over come these problems.

But now, the Government and law also can take steps over these Dowry wanters. But those could be severed very soon. Every girl should take a vow that she would never give dowry. This is the only solution for this problem.
To

The Chief Minister,
Boyass garden,
Madras.

Respected Madam,

As a citizen of this state I really feel guilty to narrate the following problems. Today we all know how education is valued in our day-to-day life.

Even a coolie man like his son to be educated well. Government had also taken necessary steps. There was no much problem up to higher secondary studies. But when a student try to enter into college he or she has to face many problems.

They demand compulsory donation for each seat. In case of higher studies this demands reaches the dowary demands or exceeds it. However when we overcome such struggle, we are invited by a board “No Vacancy”. As soon as the one leaves the college, he would be ready in grasping the wanted column.

By luck when he recieved a interview card, it would only be a formality application. There too money has its own place. Secondly when one attends a government exams like TNPSC, the moneys plays an important role than his intelligence in the exam. Blooming youngsters, lost all their faith and become idle. There is nothing more to blame them.

So we request you taken some necessary step to change this condition atleas in the future generation.

Thanking you,

Yours Sincerely,
To

Nelson Mandela,
South Africa,

Sir,

I trust this letter finds you in good health. I am doing degree course in maths. I happen to come across a lesson named ‘My Struggle for an education’ by Brooker. T. Washington. I’m deeply depressed by the whites supremacy in your country. Why don’t they understand that skin colour has nothing to do with a man’s ability. It is their ability and intelligence matters. I learned that natives are not allowed to travel in bus or in trains as the whites. I can’t tolerate even on hearing it. You people must be praised for your patience.

I also heard that you people are not allowed to use the beach. Beach is a natural thing, and how they can deny entry to the natives. I think their supremacy is too much to resist. Your natives are hardworking and have more physical power than the whites. Peoples of Africa has to show their self power and have to prove their intelligence in the international level, so that they may not under estimated by the future generation. The natives of S. Africa must develop self confidence in their children and to love each other.

There must be cooperation among the people, which is the essential fuel to break the shackles of Whites domination.

I have great respect to your sacrifice and policy. May god you with a long life.

With lots of expectation

SPECIMEN - 3

(As I studied this struggle, I thought of the situation in India. Then, I was fond of meeting Mr. Martin Luther king. I had a conversation with him.)

Myself : Hello, Sir. I am from India
Martin : Oh! Then, there you won’t have this apartheid as in mine or in Africa.
Myself : Yes, sir. Really, I want to discuss about this apartheid to you.
Martin : Yes, tell me. What all do you want?
Myself : In your period, what is the condition of black people in U.S.A.?
Martin : I am having severe pain in my heart even when I was thinking of those incidents.
Myself : From the lesson, I studied, I came to know that schools were very rare for blacks in those days? Isn't it?
Martin : Yes, in my period, blacks were meant only for work. They had to work as slaves under white people. They were not given education.
Myself : Had they worked all the time?
Martin : Yes, We were only slaves. We didn't have schools. There were shops, streets, and various places meant only for blacks. We couldn't enter into the places of whites.
Myself : What about churches?
Martin : They didn't even allow us to pass by the church.
Myself : What made you to fight for their freedom?
Martin : In my village, only blacks were living. My ambition is to study many things. But, my parents did not send me to school. As I was asking the reason, I came to know the cruelty done to blacks.
Myself : Then, you resolved that you might do something to save people.
Martin : Yes, From that time, I heard so cruel deeds done to our people. They would kill us for anything. The government consisted of white people and the laws were different for each.
Myself : I heard that blacks could not be given any rights. Is it true?
Martin : Yes, We couldn't comment on the officials & government. Hospitals would not be built for blacks. Some shops maintained by the whites wouldn't give any goods for us.
Myself : Could you be able to use buses?
Martin : No. Some buses were meant for us. We couldn't use other than those. The same was the case in Africa also.
Myself : Do you think that everything is set right now both in Africa and U.S.A.?
Martin : No, I can't. Because, the Los Angles' incident that took place last year is an example for the dictatorship of the whites.
Myself : What about in South Africa?
Martin: To end the apartheid, UNO banned the exports, imports and transport facilities to South Africa for some years. But, they prisoned the leader, Nelson Mandela for 27 years.

Myself: Now, the government came forward to share the cabinet between the blacks and the whites, know?

Martin: No, it's only a drama. If they accepted the proposals of Mandela, then what hell made them to control the blacks all over the country?

Myself: Do you agree that the situation to-day is better when compared with your period?

Martin: Yes, I agree. For the full freedom, the blacks must unite under a leader like Mandela. They all must fight against the whites in Ahimsa way.

Myself: Yes, you're correct. Let's wait for a bright day which is going to give equal rights for all human beings in this wonderful earth.

(Then, I shouted in joy in my sleep. All was just a dream. But, that bright day will come and awake us definitely).

SPECIMEN - 4

On the day of my college admission my friend came to my house. She is a poor child who had to work for her earnings. Earning when learning is a good habit which is practised in foreign counties. But there should not be compulsory earning. In our country the students earn their life during learning due to their difficulties in the family. In this way she is working due to her family problems. She also had put application to the college and an interview card also had came. So, I asked her whether she is attending the interview. She replied that her family members were not interested in her studies. So they had asked her to stop that idea of learning. But she is an intelligent student in the school and she had great wishes about her studies. She had told about her wishes already to me. So I wished to help her for studying and said to her. But she refused my help because she had to look after her family also.

I understood her wishes and the reasons for not accepting my help. So I went to her parents and said them to give her education, since she is an intelligent student. But they replied that they had no money for her admission. Since they are low caste people (S.E. S.T.) they had sent this card. Even though they will ask money for admission. But we had only a hundred rupee. Then I told them that I will help them for her studies. After a great hesitation they accepted my
help. Then we went to the college and I paid donation for both of them and we were admitted. After her admission her family members were very happy. She had brothers and sisters also. So in order to help her family our friends joined together and helped them. With our help they were very much benefited even though it was only a small help. We were also only middle class people. So we also had to face many problems for this wealth. Education is a precious and valuable stone. To obtain this stone we have to lend money. But nowadays it becomes more because each and every person whom we depend on need corruption. The above family is not even able to pay for fees then how can they give corruption. So they stop their childrens from learning.

In this manner many students had to face many struggles to have their education. Madam, So, I request you to open more Government colleges so that education will be available to the poor. Many inspections should be conducted because the teachers of the Government schools and colleges does not even take care to take their lessons properly. This is my report and request to you Madam. J. Jayalalitha to lessen our struggles for education. So that our state will also come forward in every aspects of life.

SPECIMEN - 5

To
The Chief Minister,
Tamil Nadu.

Respected Madam,

Education is the root of life. Without this root the life cannot stand erect. Only the university education provides the way for the youngers to face the world. But to get an admission in the college is not so easy as the school admission.

Students who are finishing their higher-Secondary education are so hopeful that they are going to reach their destination. But only some students get the required marks. They acheive their aim. But others condition is pitiable. Education has got no value now. When one pay the amount required by the institution he will get the professional course. Students who are really possessing the knowledge are being pushed backwards.

After being disappointed students go to arts & science colleges. Even there they can’t get admission easily. They should pay the amount to get admission whatever marks they had got; what knowledge they posses; The importance is
given only to the money not to the knowledge. If they want money for constructing buildings they can ask for donation. But this is not the proper way to get the money.

If the students are being disappointed with their admission in the college they lose the importance of their university education. They don't know that the education is invaluable. So they waste their precious time in the college. They don't have the interest to go to the library & get the knowledge and spread it. Instead they simply wander here and there and easily waste the essence of youth. They can do any marvel. But they are not properly guided. If the admission give importance to the knowledge everyone can become a shining star in the universe. Who knows?

Madam, I have submitted my opinion here. I request you to change the conditions in the admission and bring a new law to encourage the students. India will beat all other countries then.

Thanking you,

Yours sincerely,

SPECIMEN - 6

My respected teacher Radhakrishnan

I first humbly present my respects to you. In the lesson my struggle for an education we came across facts which moved us very much. It clearly describes the love Brooker T. Washington had for education. I would like to talk a few words and clear my doubts on this aspect.

From the begining we see that man was born with knowledge. He slowly learnt to use it. Slowly wisdom began to spread throughout the world, Usually I feel that education tried its best to survive. All do not struggle for education. Some people don't even care about education. Education is in a situation to knock at the door of each illiterate and begging him to learn.

In the past days the people of higher caste were educated. But education did knock the door of the lower castes. Some people did open. Education greatly helped those who adored it. I will never agree if any one say that people struggle for education. If we take India everybody is being asked to study. But not much of them cares. It does not mean that one has to go to school to educate. There are
other ways of education. Our people have the thought that only by going school one receives education. That is why nowadays people have begun to hate education.

Nowadays people buy degree's but they are such fools as they do not know that by simply having degrees it does not mean that they are educated. Now you see the situation for education. Everybody just sits complaining others. No one realises that education can be got in easy ways.

So education has survived a lot. Still if man is going to neglect it, I don’t think it would survive. The meaning of education is to gain wisdom and to act properly in life. Nowadays many do not know to tackle problems. This is due to lack of education. We can’t say that the developed countries are educated. They do have school education but they do not have many things which is needed for life. This is the reason why scientific instrument becomes weapons of destruction.

These are my ideas Please clarify them.

Thanking you,

Yours obediently

SPECIMEN- 7

Dear Bindu;

Hai! how are you. I hope this letter finds you in good health and cheers. I hope you will be happy in your state. But I suffered a lot until I get an admission in Vellalar college. But you are quiet lucky yaar, to study B.E in Anna University. Can we ever forget those pleasant and colourful days which we spent in our school life. I can never forget how I suffered until I got an admission for my B.Sc degree course. I like to share my tragic experience with you. I think you were busily studying for your entrance exams at this time I met a mishap yaar my admission was on 17.6.92 and I was quiet sure that I will get an admission easily because we were vellalar students. I was a fine Sunday and after finishing my Lunch at home I went to Uma’s house to tell that the next day is my admission. But see my fate yaar. When I got down from my bus and my leg met a fracture and my leg started swelling yaar.

Everyone were dumbfixed and no one came to help me. It was a terrific
experience in my life or else, or else, by chance I would have written the entrance exam and now I too might have got an seat in some professional course. But it is my fate no one can fight against it. Moreover my college life is very boring and I don't like any friends and I miss you a lot. I will pray to god for your well being and when I think about you I remember the words of P.B. Shelley.

'To meet, to know, to love and then to part

is the saddest tale of many but for a human heart'.

Rest in the next.

Yours Everloving,
