# CONTENTS

## CHAPTER I

1.1. Introduction ........................................ 1
1.2. Conjugated Polymers ................................. 2
1.3. Polyaniline and Polyaniline – Poly (methyl methacrylate) blend............... 4
1.4. Survey of Literature ................................. 6
1.5. Objective of the Present work ...................... 13
1.6. Structure of the Thesis .............................. 14
1.7. List of Main Publications ......................... 15

References .................................................. 18

## CHAPTER II

EXPERIMENTAL TECHNIQUES

2.1. Introduction ........................................ 23
2.2. Polymer Synthesis and Doping ..................... 23
2.3. Preparation of Polymer Solutions .................. 27
2.4. Polymer Film Preparation .......................... 28
2.5. Physical Characterization Techniques ............. 31
2.6. Electrical Conductivity Measurements ............. 38

References .................................................. 43

## CHAPTER III

STRUCTURE, COMPOSITION AND SURFACE ANALYSIS

3.1. Introduction .......................................... 45
CHAPTER IV
OPTICAL PROPERTIES and RAMAN SPECTROSCOPY

4.1. Introduction
4.2 Optical Absorption in Polymers
4.3 Theory
4.4 Experimental Techniques
4.5 Results and Discussion
4.6 Raman Spectroscopy
4.7 Experimental Techniques
4.8 Results and Discussion
4.9 Conclusions

CHAPTER V
DIRECT CURRENT CONDUCTION STUDIES

5.1. Introduction
5.2. DC Conduction Processes
5.3. Measurements
5.4. Results and Discussion

5.4.1 DC conductivity of undoped and lightly doped polyaniline films at low fields 100

5.4.2 DC conductivity of (PANI-CSA)$_x$ - (PMMA)$_{1-x}$ blend films at low fields 104

5.4.3 DC conductivity of undoped and lightly doped polyaniline films at high fields 107

5.4.4 DC conductivity of (PANI-CSA)$_x$ - (PMMA)$_{1-x}$ blend films at high fields 113

5.5. Conclusions 124

References 126

CHAPTER VI
ALTERNATING CURRENT CONDUCTION AND DIELECTRIC STUDIES

6.1. Introduction 129

6.2. Models for Alternating Current Conduction 130

6.3. Experimental Techniques 137

6.4 Results and Discussion

6.4.1 AC conductivity of undoped and lightly doped polyaniline films 137

6.4.2 AC conductivity of (PANI-CSA)$_x$ - (PMMA)$_{1-x}$ blend films 147

6.5 Dielectric Studies 156

6.6 Experimental Techniques 158

6.7 Results and Discussion

6.7.1 Frequency and temperature dependent dielectric permittivity 159
