Acknowledgments

I wish to record my sincere thanks to Dr. E. K. Ramasami, Professor of Mathematics, Bharathiar University, Coimbatore, for his guidance and continuous encouragement during the process of preparing the thesis.

I would like to thank to Dr. K. Balachandran, Professor and Head, Department of Mathematics for his scientific support, strong encouragement and enlighten me to this area of research. I am deeply thankful to him for providing excellent working conditions in an appreciative, diversified working environment at the Department of Mathematics, Bharathiar University, Coimbatore.

I am especially thankful to Dr. K. Sakthivel, Post Doctoral Fellow, Department of Mathematics, Yonsei University, Seoul, Korea, for his support and constant help. His enthusiasm and generous explanations at times of difficulty made a very exciting and a relaxing atmosphere. I have learned so many things from him.

I am thankful to Dr. J.-H. Kim, Professor of Mathematics, Yonsei University, Seoul, Korea, for a fruitful collaboration and also I wish to record my sincere thanks to Dr. M. V. Klibanov, Professor of Mathematics and Statistics, University of North Carolina at Charlotte, USA, for valuable comments and suggestions on the part of my work.

My special thanks are also due to my friends and all my research colleagues for their kind help during the tenure of my study.

Last but not least. I am very grateful to my parents and my brother, for their dedication, unconditional love and support they always given me.

N. Barani Balan
