Acknowledgement

This thesis is the end of my journey in obtaining my Ph.D. I have not travelled in a vacuum in this journey. This thesis has been kept on track and been seen through to completion with the support and encouragement of numerous people including my well wishers, my friends, colleagues and various institutions. At the end of my thesis I would like to thank all those people who made this thesis possible and an unforgettable experience for me.

This work would not have been possible without the encouragement and able guidance of Dr. S. Srinivasan from the first day of our Research Discussion, to all the way journey towards my research. Words are too short to represent Srinivasan sir’s Personality and Motivation on paper. Being a father figure in the area of Computer Science, having team of countless people, he has always given priority to my need. Lot more thanks to Sir for his belief in my abilities, his advice, his encouragement, his wisdom, his intellectual brilliance, and his endless kindness. Dr. S. Srinivasan provided me the support I needed at every step. It is his careful supervision that brought me wherever I stand today in my research career. My Research period passed as smooth as fish swims in river.

It’s my fortune to gratefully acknowledge the support of some special individuals. Words fail me to express my appreciation to Dr. Shubhra Das for her support, generous care and the homely feeling. She was always been beside me during the happy and hard moments to push me and motivate me. I can see the good shape of my thesis because of her help and suggestions in formatting the entire thesis. A special thanks to Dr. A. Das for his support and motivation during my research.

A journey is easier when you travel together. Interdependence is certainly more valuable than independence. This thesis is the result of support of Amit Kumar Goel Sir and Vivek Jaglan Sir who were always there when I really needed. Thank you doesn’t seem sufficient but it is said with appreciation and respect to both of them for their support, encouragement, care, understanding and precious friendship. I am much indebted to Vivek Sir for his valuable advice in my work, spending his precious time to read this thesis and give his valuable suggestions. It is also a pleasure to mention my good friends,
Nitin, Chotu, Twinkle, Rajiv Sir, Shushant, Arti Mam and JJ for their love, care, support and creating a pleasant atmosphere for me here.

I convey special acknowledgement to Rajan Agarwal who supported me by arranging data from various companies, whenever I needed.

Last but not least, I would like to pay high regards to my Mother and Father, Father In-law and Mother In-law for their sincere encouragement and inspiration throughout my research work and lifting me uphill this phase of life. I owe everything to them. Besides this, several people have knowingly and unknowingly helped me in the successful completion of this project.

I also thank Naresh Sharma who enquired about my research progress and motivated as well.

Last but not least, I would like to pay high regards to my Wife, Dr. Aditi Agarwal, without her this research work would not have completed. A special Thank you to my son Mehul, whom I was not able to give that much time and attention because of my thesis work.
