ACKNOWLEDGEMENTS

First and foremost, I express my sincere, and deep filling thanks to the meticulous guidance of Prof. Sa.K. Narayandass, Head, Department of Physics, Bharathiar University, Coimbatore, my guide for his encouragement and support at each and every stage of my research work which made the work get completed in time. He wielded the essential goal at the right junctures without attempting to cramp my natural ways of working and thinking. I am extremely indebted to him and offer my deep sense of gratitude and thank once again.

I wish to express my gratefulness to Dr. D. Mangalaraj, Reader in Physics, Bharathiar University, Coimbatore, for his valuable ideas, suggestions and comments, above all to his constant encouragement and well wishes throughout this course.

I express my profound sense of indebtedness to Prof. Hee Chul Lee, Department of Electrical Engineering and Computer Science, Korea Advanced Institute of Science and Technology [KAIST], Taejon, Korea for having given me a chance to work in his lab as a Visiting Research Student and for extending all the experimental facilities and also for his useful discussions and comments throughout my course of the work. Also I thank him for given me training to work in Clean Room facility. I sincerely thank Leonard J. Kroko, Tustin, U.S.A., for extending ion implantation facilities and also for his useful discussion.

I take this opportunity to thank the Korea Advanced Institute of Science and Technology [KAIST], Taejon, South Korea for awarding me Visiting Research Student Fellowship and permitting me to work in the Department of Electrical Engineering and Computer Science, KAIST. I thank Defence Research Development Organization, Government of India for the award of Junior Research Fellow.

I am sincerely thankful to Soo Ho Bae, Woo Suk Choi, Jang Hwa Choi, Sang Jung Lee, Ming Young Lee, Keedong Yang, Doo Hyung Woo, Jeong Geun Kim, Choon Sup Lee and all my friends, Department of Electrical Engineering and Computer Science, KAIST, Korea for all their help in teaching all the experimental facilities, measurements and discussion.
I thank Sung Woo Lee and Mebratu Gallo, Department of Physics, KAIST for their help and discussion during the Raman scattering and Photoluminescence measurements. I thank Lee Tae Ho, Department of Chemical Engineering for helping me in optical measurements. I thank all my friends in Department of Physics, Department of Material Science and Engineering and Department of Chemical Engineering, KAIST for all their help and discussion. I thank all my Indian friends at Korea for their constant encouragement and support during my stay at KAIST.

I take this opportunity to thank Dr. K. Senthil, Dr. D. Nataraj, Dr. R. Ramasamy, K. Prabakar, B. Karunagaran, V. Senthil Kumar, R.T. Rajendra Kumar, C. Viswanathan, Y.L. Jeyachandran, S. Venkatachalam, M. Thamilselvan, K. Premnazeer, S. Muruganand, S. Gopal and S. Agilan for making the research and social environment alive. It's pleasure to thank my beloved sisters M. Mekaladevi, M.K. Shobana, N. Jeyasri, Sheeba Anu Jacob and Sriranjini for their support.

I am extremely happy to thank all the “Glittering Inmates” and all my friends and well wishers who helped me in all respect. My special thanks to Nannnndu and Judeee for their care, affection and encouragement, which gave me the spirit and courage both for my academic and social life.

Finally, I thank my Amma, Appa, Patti, Senthil, Suresh, Shankar, Geetha, Kavitha, Rohini, Abijith Adhithya, Anuj Adhithya and Anushapriya for their love, affection, care and support in all respect, which helped me to concentrate in my research work.

M. Sridharan.
