Moment of joyful tears flowing through my cheeks as I am writing this. Now the time has come to thank everybody who had played crucial roles in my life, making me to what I am today. Before mentioning all names I would like to thank, all who had discouraged me during the journey as they are the fuel that made me go forward with confidence.

Thanking God ,the almighty for doing research for me, writing thesis for me, reading papers for me and a lot. Everything done by Him not me.I am too small to do all these above mentioned things.

Sarita Ma’m, my mentor and research guide is the real inspirer, motivator and main or the only factor that made this thesis a reality. One thing I enjoyed during my research with her was the freedom in working which I never enjoyed earlier.Ma’m’s positive approach made me optimistic. Her encouragement and support helped me a lot in my thesis days. She had given me an opportunity to teach post graduate students of the department which also helped me. She made me to attend seminars and workshops. Evening tea discussions and scientific discussions with her had surely added more to my research career, though I cannot do full justice to all our discussions. It was a great honour to do my doctoral research with Ma’m. Once again thank you Ma’m but I still realise that two words are not enough to express my gratitude to my guide.

I sincerely express my thanks to Dr. Padma Nambisan, Head, Department of Biotechnology, CUSAT for her valuable suggestions and advice as my doctoral committee member. From first doctoral committee presentation to the presynopsis presentation, her valuable suggestions had contributed a lot in shaping up the thesis to this final condition.

I would like to express my heartfelt thanks to Prof. Dr. M. Chandrasekharan for his valuable scientific talk during his time at the department. His memories
about the old days, experiences of scientists from the past etc inspired me a lot. Talk with him for sometime will add some knowledge important that carry to a life time.

I express my gratitude to Prof. Dr. C.S. Paulose for his guidance and help during my research. Especially during my PhD registration times his support needs to be remembered. I also express my thanks to Dr. P.M. Sherief, Adjunct Faculty, Department of Biotechnology for his keen interest, valuable suggestions and backing all through my work.

I would like to express my heartfelt thanks to Dr. Przemyslaw Plonka, Assistant Professor, Jagiellonian University, Kraków, Poland for his advices through emails and messages. As a pioneer in bacterial melanin research his advices helped me a lot. Thanking all other scientists and researchers for their advices they had given through social websites.

I take this opportunity to sincerely acknowledge Department of Science and Technology for the financial support in the form of INSPIRE Junior and Senior Research Fellowship.

Now I would like to express my sincere gratitude to all those who had converted the spark of light in my eyes to clear vision. Especially Dr. Jimmy, Ozanum Eye Centre, Kollam had given me a lot of confidence which is driving me today. Thanking all doctors and opticians who had played a good role in my research.

Thanking my all teachers from LKG, where I can remember Jessy sister to now who had played an important role in my life. Thanks to Girija Teacher and her photosynthesis class which fuelled me till now. Thanks Hashim Sir for making my research life easy by helping in clearing CSIR-NET.

Now I express my sincere and heartfelt gratitude to all my research guides who had added something valuable to my research career. First I would like to thank the man who first coined the term “Biotechnology” to me, Dr. Shaji John, Marthoma
College of Science and Technology, Ayur. He was a great inspiration for me and from him only the technique plant tissue culture came to my life. I would like to thank Dr. Malini Laloraya, Rajiv Gandhi Center for Biotechnology, Trivandrum for giving me an opportunity to familiarize with animal cell culture and molecular techniques during my MSc thesis. Dr. Zyju. D.P, Dr. Shiny Titus and Dr. Ranjini A. P. need to be remembered in this occasion.

I would like to express my gratitude to Dr. S. Mukunthakumar, JNTBGRI, Palode for giving me the first research assignment on Musa conservation. I would thank the whole biofuel research team of CSIR-NIIST, Trivandrum for helping me to familiarize with the real research experience. Thanking my guides Dr. Ashok Pandey, Dr. Rajeev K. Sukumaran, Dr. Binod Parameswaran, Dr. Sindhu Ravindran, Mr. Vikram Surender, Mr. Kiran Kumar and Dr. Madhavan Namboothiri for helping me a lot during bioethanol making.

Thanking Dr. Bhavanath Jha, CSIR-CSMCRJ, Bhavnagar for granting me a re-entry into research after a long break. Thanking Dr. Laxmipriya Namboothiri, MSU Baroda for making me good in animal handling. Thanking Dr. Rashiduneessa Beegam and her lab where my concept of melanin research budded up. Thanking Dr. Naresh Kumar, HOD, Dept of Biochemistry, MSU Baroda for giving me an opportunity to work in the Department. I would like to thank Dr. Bindu Paul-Prasanth, Amrita, Kochi for teaching me how to write a research story. It had immensely helped in my career. Thanking Dr. Mohd Hatha, CUSAT, Kochi for guiding me to Sarita Ma’m during my hopeless times. Please forgive if I miss someone and a big thanks to all my research guides.

My colleagues in all laboratories I had worked so far helped me a lot. Though naming everyone is difficult. Thanking the entire CSIR-NIIST friends. Thanking CSIR-CSMCRJ buddies Ujwal, Hardik, Nilesh, Kiran, Mohit, Vijay and Hiral for giving a company at a place I am not familiar with. Thanking Radha and Nirja MSU Baroda for their efforts in familiarizing me with lab animals.
I am deeply indebted my colleagues at the Microbial Genetics Laboratory, Department of Biotechnology, CUSAT, Thanks to Vijaya Miss for making me produce melanin from the first day at the lab. I still remember that she had given her isolates and ask me to produce melanin on the first day at the lab. From that day I continued the effort to produce it efficiently because of her encouragement. Siju Sir needs to be thanked for teaching me the microbiological techniques to which I am not familiar at that time. Jeena who was not much talkative but had helped in my research during our small small discussions. Linda needs to be thanked for making the lab atmosphere so cool as she is apt to be called as Mrs.Cool. Helvin and Smitha, how to thank them I don’t know. They had been good motivators and made the lab lively which added a lot to the working atmosphere.

Thanking Raghul and Cikesh. I am in a confusion whether I need to thank them separately or like this. Thanking both for their companionship. Helping in most difficult situations of life, visiting me when I am heart broken. Both had been with me from the first day. Going for movies at Aluva with them, in scientific discussions, in the laboratory and out of the laboratory, they had been a great company. Thanking Jijith for his friendship and affection to me. Thanking Rinu in helping me a lot in my research at the final stages. His presence in the evenings made my thesis writing lively and tension free.

Thanking Harisree for her great help during these years in the lab. We had been done a lot of scientific discussions which added a great to my research. Her companionship in Indian Science Congress at Jammu needs to be remembered. She needs to be thanked for providing me the Sagar Sampada sediment samples which she had collected. More than half of the organisms used in the thesis were from that cruise. Mridula needs to be thanked for her good friendship. We had been discussed a lot on her CRISPRs. Still I don’t know exactly what it is in detail. That discussions really made by brain work and helped me a lot.

Laxmi, we both came to the lab in the same period, both INSPIRE fellows had helped me a lot in research. Mainly during biofilm assays her help was immense.
She had provided her strong biofilm forming isolates which needs to be acknowledged. She had helped me in processing many fellowship papers which need to be thanked. Thanking Amritha helping me during her MSc student project. Thanking Nandita for her friendship and support during the research. Thanking Rekha for giving a great company. Discussions with her were greatly encouraging and positive. Thanks to Anu for good scientific discussions we had done at the lab. It had surely added to my grey matter. Thanking Sritha for her good friendship and support during the final stages of the thesis. Bindiya and Tina needs to be acknowledged for their support and friendship during my days at the lab. Thanks all.

My special thanks to the members of the Immunotechnology Lab, Manzur Sir Sapna Chechi and Abraham Chettan for their support and advice. I also extend my gratitude to Manju Miss, Jikky, Jasmine, Sudha, Arinnia, Soumya, Anala, Aiswarya, Nayana, Anuja and all the research scholars of the Neuroscience laboratory for their friendship, help and co-operation.

I also thank Sajan Chettan, Dolees Chettan, Karthik, Ajayan, Jayan, Smijin, Anju, Shilpa, Roshini and Naitil for their help and support. I am also thankful to Anoop, Sreekanth Sir and Manjusha Ma’m for their love and encouragement.

I thank all the admininisterial staff of the department for their prompt support and help. I thankfully recall all the M.Sc. students of this Department for their companionship, help and co-operation.

I express my sincere gratitude to SNGIST Arts and Science College Principal and management for being more flexible during thesis writing days even by providing many weeks leave. Thanking my colleagues who had adjusted a lot in my absence.

Without thanking my Pappa and Mummy I cannot end this acknowledgement. Their vision to get what they failed to get in their life made me stand like this. Lot of sweat, tears and blood they shed need to be thanked at this
stage. My brother Nithin too will take the credit of the thesis as he was with me at all the stages of my life. Thanking my in-laws, Appachan, Ammachi, Pappa and Amma for their great support during the journey. The support of my Aliyan Jastin cannot be forgotten at this stage. I also thank the people who encouraged me and helped me in building confidence throughout my life. Thanking some of the church members of All Saints Marthoma Church, Kampa code for the encouragement. Thanking Mathinteyathe Appachan for his encouragement given. Thanks all.

Thanking my Jewels, my Jesly and Liiza for the support during all stages of my research. During my thesis writing the struggle Jesly had with an one year old child cannot be thanked in this few lines. Thanks Both.

If anyone missed, Hundreds of thanks to them too. Thank you all.

Noble K Kurian
