ACKNOWLEDGEMENTS

As the compilation of a thesis depicting my doctoral work completes its arduous journey from wish to fulfillment a realization ensues that this upward climb towards the goal has been exciting, adventurous and at times challenging but the gracious acts of many made it enjoyable and fruitful. I would like to register my gratitude to them all. During this process if I happen to skip a few names due to inadvertent error, I hope I will be forgiven.

To the giver of everything-the sole source and substratum of finitude-The Infinite Almighty, my heart bows in solemn gratitude for having nurtured and nourished me to be able to reach this summit of academic achievement.

First of all it fills me with great joy in expressing my gratitude to my supervisor Dr. V. Shanmugam, whose able guidance, creative thoughts and positive criticism had made this work a possibility. He had taken great pains starting from the initial planning of my research work right up to the drafting and correction of the thesis. By his association I have learnt many life altering lessons like hard working nature, diligence and value for time. He had exhibited great enthusiasm and interest in bringing this work to a grand conclusion.

I express my deep sense of gratitude to Dr. P.S. Ahuja, Hon. Director IHBT, Palampur for giving me the opportunity to work in such a well equipped infrastructural setup. He has been a pillar of strength and inspiration all throughout my research tenure here at IHBT.

I would like to acknowledge the timely guidance, encouragement and invaluable support of Dr. A.A. Zaidi, Scientist and Head, Floriculture Division, IHBT, Palampur. It gives me great pleasure in expressing my heartfelt thanks to him as I feel highly indebted for his affection and blessings.

I extend my sincere and heartfelt gratitude to Dr. Pratap Pati, Head, Biotech Department, Guru Nanak Dev University, for his valuable suggestions and encouragement towards my work.

I would like to acknowledge the generous gift of tobacco chitinase antiserum by Prof. Michael Legrand and Pienette Geoffroy, Centre National De La Recherche Scientifique, France. They have helped me in furthering my works to a great extend.

I would like to thank Dr. D. Ananthapadmanaban Scientist, Microbial Type Culture Collection (MTCC), IMTECH Chandigarh, for his expert guidance during the identification of the fungal isolates used in this study. I remain indebted to him for his kind and amicable nature.
I would like to put forward a heartfelt gesture of thankfulness to all the Administrative staff, the Stores staff and Library staff. All of them have been kind, considerate and offered prompt action on all my requests and official procedures.

The strong support and perpetual encouragement provided by my loving parents, brothers and sisters during my PhD work deserves special mention. Their faith and understanding have infused me with great courage and determination. No words can express my gratitude towards my affectionate wife Mrs. Virtu for her moral support, care and appreciation. Her patience and accepting ways have contributed greatly towards a successful compilation of my thesis.

All of my seniors and colleagues have been readily helpful and heartening and their memories will remain etched in my heart, to mention a few Dr. Dharam Singh, Dr. Kashmir Singh and Dr. Ang Ringjing Sherpa. My special thanks goes to Pardeep Bharadwaj, he has been a constant friend and philosopher and have had a great positive influence throughout my entire stay here at IHBT Palampur.

I would like to remember with gratitude the help rendered by Rajni Verma during the founding stages of my research work. I would also like to take this opportunity to thank my immediate lab mates and friends Vivek Sharma, Richa Sharma, Samriti Gupta and Kamini Atri, together we have enjoyed a very congenial and lively atmosphere in the lab.

It would have been a very agonizing existence without friends and well wishers but God has been very kind to me by blessing me with plenty of true friends and my friendship and gratitude remains steadfast with all of them. Mentioning all of them would require several pages, so I wish to pick a few. Sunil Singh, Prabhakar, Aksay Nag, Sewa Singh, Awadesh Pal, Praveen Rahi, A. Paul and Vikas Jaitak. All of us have enjoyed our mutual co-operation and company and hope that it will grow with the passing years. Thank you all.

Council of Scientific and Industrial Research (CSIR) is gratefully acknowledged for awarding me with Senior Research Fellowship (SRF).

Last but not the least, I would like to gratefully acknowledge the timely help and assistance provided by our lab assistants Mr. Anoop Kumar and Mr. Harnam.

(Naosekpam Ajit Singh)
