

ACKNOWLEDGEMENT

Acknowledgements

I am deeply indebted to the most distinguished personality Prof. M.R. Raghavachar who will always be remembered gratefully by those who knew and worked with him. He has always been a source of help, guidance and inspiration to me. Besides suggesting this problem, he spared no effort to make the work as a whole homogeneous, accurate and lucid.

I am very much thankful to the members of staff Prof. P. Kandaswamy, Dr. K. Balachandaran, Dr. S.P. Anjalidevi and Dr. E.K. Ramasami of Department of Mathematics, Bharathiar University, Coimbatore for their co-operation and encouragement.

I acknowledge gratefully the financial assistance given by University Grants Commission, India.

The contribution made by my family is something that only another author can fully understand. They were with me in thought, work and motivation throughout.
