Acknowledgements

First and foremost, I offer my salutations to revered Dr. Shivshankar Mishra, my mentor and my guide for helping me to achieve a goal, which seemed to be too far-fetched and daunting in the beginning. I am greatly indebted to him for dispelling my apprehensions and doubts about the vastness of the subject, putting me on the right track, keeping me going on till the end and not letting me deviate from the topic in the least. It goes to his credit for bringing the unachievable subject within my reach by simplifying it and making it appear less complicated. I consider myself, indeed fortunate to have been guided by such a renowned person of Dr. Mishra’s stature and his equally humble wife Dr. V. S. Mishra.

I dedicate this research work to my father, late Col. A. K. Singh, who took great pride in all my achievements, however small, mean, or insignificant as they could be. It was his confidence in me; motivation and encouragement that inspired me to undertake this research work and explore the areas that require in-depth study and concrete solutions. Unfortunately for me, my father left for his heavenly abode, when I was half way through my research work. It was in this time of anguish and pain and a sense of rudderlessness that my in-laws Dr. and Mrs. V. N. Ingle took upon themselves the responsibility of re-motivating me and encouraging me to achieve a goal that my father had set out for me. Had it not been for their constant support, this work would not have seen the light of the day.

The binding force of this work is my better-half Vikrant Ingle who has proved to be a real better half in the true sense of the word. His technical expertise and analytical skills proved to be great assets in data gathering, analyzing, arriving at conclusions, compiling and printing.

I feel immensely happy and greatly satisfied that I have been able to fulfill my younger sister Lt. Shalini Chauhan (Indian Navy) and my mother’s long cherished dream of seeing me putting on the mantle of Doctor of Philosophy.

Anju Chauhan,
Aurangabad
