LIST OF TABLES

Chapter 2 REVIEW OF LITERATURE
Table 1. Prevalence studies of Glaucoma in Indian population
Table 2. Candidate Loci/genes involved in Glaucoma
Table 3. Other candidate loci/genes involved in glaucoma
Table 4. Distribution of MYOC mutations in different populations
Table 5. Distribution of CYP1B1 mutations across the different populations
Table 6. Genotype frequencies of MTHFR SNP across different populations
Table 7. Distribution of p-21 SNP across the different populations
Table 8: Distribution of genotype frequencies of IL -1 SNPs across the different populations

Chapter 3 MATERIALS AND METHODS
Table 1. Geographical distribution of POAG, PACG and PAC cases
Table 2. Different methods used in candidate gene screening
Table 3. List of the primer sequences used for amplifying the candidate genes
Table 4: Reagents used in a standard PCR method
Table 5. Conditions used for cycle sequencing
Table 6. Reagents used for restriction digestion
Table 7. List of restriction enzymes used in PCR-RFLP

Chapter 4 RESULTS
Table 1. Family history and gender distribution among POAG, JOAG and PACG cases
Table 2. Distribution of MYOC mutations in POAG, JOAG, PACG and PAC cases
Table 3. Clinical features of POAG, JOAG, PACG and PAC patients with MYOC mutations at presentation
Table 4. Distribution of Gln48His in Indian populations
Table 5. Allele frequencies of MYOC polymorphisms in POAG and PACG cases
Table 6. Distribution of genotype frequencies of MYOC polymorphisms in POAG and PACG cases
Table 7. Synonymous codon changes in MYOC among the POAG and PACG cases
Table 8. Distribution of CYP1B1 mutations in POAG and PACG cases
Table 9. Clinical features of POAG, JOAG and PACG patients with CYP1B1 mutations
Table 10. List of CYP1B1 polymorphisms observed in POAG and PACG
Table 11. Allele frequencies of the CYP1B1 polymorphisms in POAG and PACG cases and controls
Table 12. Distribution of genotype frequencies of CYP1B1 polymorphisms in POAG and PACG cases
Table 13. Allele frequencies of Interleukin-1 polymorphisms in POAG and PACG cases and controls
Table 14. Genotype distribution of Interleukin-1 polymorphisms in POAG and PACG cases and controls
Table 15. Association between IL-1β –511 genotypes and visual fields in POAG and PACG cases
Table 16. Association between IL-1β +3953 genotypes and visual fields in POAG and PACG cases
Table 17. Association between IL-1α -889 genotypes and visual fields in POAG and PACG cases
Table 18. Allele frequencies of the MTHFR polymorphism (c.677C>T) among the POAG cases and controls
Table 19. Genotype distribution of the MTHFR polymorphism (c.677C>T) among the POAG cases and controls
Table 20. Allele frequencies of p-21 (C/A) Ser31Arg polymorphism among the POAG cases and controls
Table 21. Genotype distribution of p-21 (C/A) Ser31Arg polymorphism among the POAG cases and controls
Table 22. Allele frequencies of MMP9 polymorphisms in PACG cases and controls
Table 23. Genotype distribution of MMP9 –1590 (C/T) promoter and Q279R (A/G) polymorphisms among the PACG cases and controls
Chapter 5 DISCUSSION

Table 1. Comparison of phenotypes of JOAG/POAG/PACG patients with Q48H mutation in Indian populations

Table 2. Comparision of phenotypes of JOAG/POAG/PACG patients with T353I mutation among the various populations

Table 3. Comparison of phenotypes of JOAG/POAG/PACG patients with Q368X mutation among the various populations

Table 4. Comarison of phenotypes of JOAG/POAG/PACG patients with R368H mutation among the various populations

Table 5. Comparison of phenotypes of JOAG/POAG/PACG patients with E229K mutation among the various population
