Acknowledgements

This thesis is the end of my long journey in obtaining my degree in doctorate study. There are some people who made this journey easier, it is finally time to acknowledge all who have helped me in their own ways.

First and foremost, my thanks to Dr. Sangita Sood, for her invaluable support, guidance, inspiration and encouragement which helped me in carrying out the research and for writing of this thesis. As a result, research life became smooth and rewarding for me.

I would also like to thank Dr. Y.S.Dhaliwal for his essential guidance, which helped me during the course of my study, I am indebted to Dr. (Mrs) Rajni Modgil, Dr. M.K.Gupta, Dr. Kamal Mohini and Dr. N.K.Gupta the esteemed members of my advisory committee who monitored my work regularly and took efforts in reading and providing in with valuable critical comments on versions of this thesis.

I avail myself of this rare opportunity to express my ecstatic thanks to Dr.Shubhangna Sharma, Dean (COHS) and all the teachers of the Department of Food Science and Nutrition for their kind cooperation and impeccable guidance during the course of the study. Thanks are duly acknowledged to the official staffs and laboratory staffs for timely and sincere help during the course of my entire study.

I am highly indebted to the worthy Vice-Chancellor, CSK HPKV, Palampur and the Dean, Postgraduate Studies and his office for providing with academic facilities during academic pursuits.

I owe my thanks to faculty members and staff of the college, specially the staff of Department of Food Science and Nutrition to do the necessary research work and for permitting me to use departmental equipments.

I acknowledge my special thanks to SMO (Dr. Dwivedi), Civil Hospital Baijnath and MS (Dr. Jaidesh Rana), Civil Hospital Palampur for their kind assistance during my study period.

There is nothing sweeter than a friend. My heartfelt thanks to Anita, Ruchika, Purvika, Madhvi, Aaprajita and Madhu and my juniors Shivani Wahia, Shivani Dhiman, Shalini and Mandeep di for providing inputs, advise and tips that helped me in staying at the right track.

Gratefully acknowledged are my parents-in-law. It is so difficult to quantify help from my father-in-law (Dr C.L.Acharya) who was always available to discuss my work and without whose assistance, my thesis
would never had been finished in time. It is with love that I greatly admire the exceptional support and continuous encouragement from my mother-in-law. Also many thanks to my brother-in-law (Vishal) who was always ready to cheer me up.

Where would I be without my family? My parents deserve special mention for their inseparable support and prayer, they always took my problems as their own and helped me to overcome them. It is so wonderful to have them beside me, in past, present, and future. Words fail me to express my appreciations for my Brother Ashish and Bhabhi Archana whose dedication, love and persistent confidence, gave me strength to complete this work. My little niece (Pauravi) made me see things easy........

Finally, most important thanks here go to my husband, Vivek Acharya. I don’t know what my life would be without him. There aren’t enough words to describe how much he guided me for the completion of this study. He believed in me even when I wanted to give up and has taken the load off my shoulder, there I found the first strong evidence of his love and support.

A word of appreciation should be credited to Mr. Ajay Walia for his painstaking effort in typing this manuscript

Last but not least, gratitude to God for blessing my life through all the tests in the past three years.

May your name be exalted, honoured, and glorified.

Place: Palampur
