ACKNOWLEDGEMENTS

At the very outset, I bow my head with deep reverence towards the one and only almighty God, for always being there for me. I avail this rarest opportunity to put on record my sincere thanks and heartfelt gratitude towards Dr. C.P. Awasthi, Senior Biochemist, Department of Chemistry and Biochemistry and Chairman of my Advisory Committee for being peacefully tolerant at every step. Without his timely help and positive approach this endeavor would not have seen the light of the day.

I am equally thankful to worthy members of my Advisory Committee Dr. T.K. Bhat, Principal Scientist, IVRI Regional station, Palampur, Dr. T.R. Sharma, Assoc. Professor, Department of Agricultural Biotechnology, Dr. Y.S. Dhalwal, Head, Department Of Food Science and Nutrition, Dr. M.K. Gupta, Assistant Professor, Department Of Microbiology and Dr. G.L. Bansal, Professor, Department of Biology and Environmental Sciences, CSK HPKV, Palampur for their valuable suggestions during the course of investigation and preparation of this manuscript.

Words seem inadequate to express my indebtedness towards Dr. P.S. Ahuja, Director and Dr. Bikram Singh, Head, NPP, IHBT, Palampur for considering my problem with an open mind and allowing me to have access to excellent facilities for bioflavonoids analysis of buckwheat samples. My sincere thanks also are due to Dr. G. Katna, the then Scientist Incharge of MAREC, Sangla for providing me necessary help.

I veraciously realize the inadequacy of words at my command to play my obeisance to Dr. R. G. Sud, Head, Deptt. Of chemistry and Biochemistry and Dean, COBS, CSK HPKV, Palampur for his blessings, affection, inspiration, and fruitful suggestions. I am indebted and I owe my heartfelt thanks to Dr. Nageswar Singh for his valuable help in the present investigation and also to Dr. Manoj Bhargava for rendering necessary help in statistical analysis of data.

I avail myself of this rare opportunity to express my ecstatic thanks to all the teachers of the Department of Chemistry and Biochemistry for their cooperation and impeccable guidance during the course of the study. I Thanks are duly acknowledged to the field and official staffs for timely and sincere help during the course of experimentation.
I shall remain thankful to all my friends from the core of my heart for their timely help and moral support.

Words can not substitute my sincere feelings towards my affectionate Nana ji and Nani ji, whose love, inspiration and moral support led me to accomplish the task with earnest efforts. Every effort is motivated by inspiration. I owe this pride to my parents without whom benevolent advice, sacrifice, blessings and encouragement, this treatise would have remained an ambition. I would like to thank my brother Rajneesh for his deep affection, inspiration and support.

I will be failing in my duties if I do not express my indebtedness towards my father-in-law and mother-in-law who have silently borne the pain of the moments when I was not with them and they needed me the most. They have never complained to me instead always encouraged me to pursue my degree. My husband Munish, a very meticulous and hardworking man has been my greatest strength and the essence of my life. He has been in true sense the mainstay of my Ph.D. programme.

All may not be mentioned but none is forgotten. 
Needless to say, all omission and errors are mine.
