ACKNOWLEDGEMENTS

Words are few when the heart is full. Though I had to delve deep into the ocean of vocabulary and ransack the racks of expression, I am excited that I could find a few words placed in sequence to express what I feel I am grateful to my “God” for showering his grace and mercy upon me in all the ways in my life and blessing me immensely with his unfailing love and care, thus enabling me to accomplish this venture. It is with a sense of relief and satisfaction that I turn to the pleasant task of acknowledging the help of all those who made this work possible. No human efforts could climb the ladder of success without being given right direction.

With immense pleasure and deep respect, a profound sense of gratitude and heartfelt thanks to my Advisor Dr. V.K. Sood, Plant Breeder, Department of Crop Improvement, for his valuable guidance and inspiration. I feel it is my great privilege to place on record my profound etiguette for his keen interest, constant encouragement, wholehearted cooperation and immense support throughout the study period and in the successful completion of the present study and without his deep involvement, my thesis could not have been successfully completed.

I place my sincere and profound thanks to Dr. J.C. Bhandari, Professor and Head, Department of Crop Improvement for providing necessary facilities and all possible help rendered to carry out the present study. I consider it as great privilege in expressing my wholehearted sense of gratitude to Dr. J.C. Bhandari for his prudent guidance and encouragement at all stages.

I emphatically extend my sincere thanks to the worthy members of my advisory committee, Dr. J.C. Bhandari (Professor), Dr. Desh Raj (Professor), Dr. Rajeev Rathore (Associate Professor), and Dr. Kamal Mohini (Associate Professor) for their valuable suggestions and tremendous cooperation during the course of the investigation and preparation of this manuscript.

I am also highly beholden to Prof. B.C. Sood, Dr. (Ms). S. Bhateria & other scientists and seniors of the Department of Crop Improvement for their inspiration, guidance and encouragement for facilitating the present research investigation.

I have immense pleasure in expressing my wholehearted sense of gratitude to Dr. H.K. Chaudhary, Professor & Incharge, MCTL, Department of Crop Improvement.

I express my gratitude to Dr. S.K. Sharma, Hon’ble VC, CSK HP Agricultural University, for his notable encouragement & indispensable support at various occasions. I also owe my thanks to the
Dr. R.K. Sharma, Dean, Post Graduate Studies, CSKHP Agricultural University, Palampur for providing me the necessary facilities to complete this study.

I have no words to express my heartfelt regards to my parents who gave me opportunity for higher education and source of inspiration and encouragement. With bountiful humbleness, I thank “Almighty God” for bestowing me a supportive in-laws, an affectionate husband, Dr. Janak whose extreme support, love and sacrifice is inexplicable and a loving son, Master Kartikay whose patience enabled me to pursue and accomplish this Doctoral programme.

I have no rhetorical gems from the ocean of words to express my profound feeling to my elder sister Ms. Mridula, Jiju Mr. Atul Raj, younger brother Mr. Vijay Singh, whose love, devotion, blessings, care and sacrifice throughout my life enabled me to achieve this seemingly invincible goal and pioneered me to hold horse throughout this irksome journey and that is something that I can never pay back.

At this moment of elation I have avail to opportunity to express my sincere thanks to my friend Dr. Tisu Tayeng, (Assistant Professor) for her suggestions and ever readiness to help and whose moral support and persistent help, it would have been quite tedious job to complete this work. My special thanks are also due to all my loving and beloved juniors – Subbu, Payal, Aarti, Puja, Minku, Deepu, Vicky, Savina, Shalu, Prabhat, Jaya, Vikas, Samuel, Naresh, Vineeta, Anila, Arpana, Indu, Khurseed, Shaukat Ahmed, Rajeev, Rishu, Kapil, lakshit and others whom I have not mentioned.

My warmest thanks are due to office and field staff of the Department of Crop Improvement, especially Milap, Piar Chand, Som, Nagu, Rajkumar ji and staff of Kangra and Kukumseri research stations for providing the facilities during the course of investigation. I also extend my sincere thanks to the staff member’s viz., Vinod Sharma, Sachin Mallotra, Kishori, Suresh, Raj Kumar and Sunil of MCTL.

Although I have taken literary license to thank to everyone but I owe to any errors and omissions.

Place: Palampur
