ACKNOWLEDGEMENTS

Five years long challenging research work through the rough seasons and tough topography of Wetlands has come to an end. There are numerous unforgettable moments of agony and elation associated with it. It is a pleasant sense of success and accomplishment that I have now the opportunity to express my gratitude for all who made this journey effective. Completion of this doctoral dissertation was possible with the support of several people. I would like to express my sincere gratitude to all of them.

First of all, I am extremely grateful to my research guide Dr. Anish K. Dua, Professor, Zoology Department, Guru Nanak Dev University for his immense knowledge, motivation, and enthusiasm. He has provided insightful discussions about the research and scientific advice at every phase. He was instrumental in motivating me to take field work in natural wetlands of Gurdaspur. His guidance helped me in all the time of research and writing of this thesis. I could not have imagined having a better advisor and mentor for my research.

My sincere thanks also go to laboratory staff of Regional Research Station, Punjab Agriculture University, Gurdaspur for their valuable contributions during soil analysis. Besides the support from universities, I would like to place on record the co-operation I got from Department of Forests & Wildlife, Gurdaspur. I have deep appreciation for Dr. Neelima Jerath, Member Secretary, Punjab Biodiversity Board (PBB) and Mr. Gurharminder Singh, Senior Scientific Officer, PBB for their encouraging words to me time to time.

A good support system was important to thrive hard times. I am at dearth of words to express my gratitude to my parents Varinder Kumar & Sudesh, my parents-in-law Dalwinder Singh Bal & Kulwant Kaur, my husband Ramanjeet Singh Bal and my lovable daughters Rehmat Bal & Darpan Sekhon who have been patient, supportive and caring. This thesis is indeed a realization of their dream.

I am grateful to Google Earth software for satellite imageries of the study sites and also to the websites: Oriental Bird Club and Royal Society for the Protection of Birds for photographs of birds.
I would also like to thank my seniors Dr. Chander Prakash and Dr. Ashwani Balhotra for their concern and constructive inputs at different stages of my research.

Last but not the least, I would also like to thank my fellow scholars in Aquatic Biology Laboratory who always supported me.
