# CONTENTS

## Chapter 1 - Introduction

1.1 Introduction  
1.2 Pathophysiology  
1.3 Molecular Biology  
1.4 Cellular Pathophysiology  
1.5 Purpose of the work

## Chapter 2 - Material & Methods

2.1 Screening & Diagnostic tests  
2.2 Hematopathology  
2.3 Biochemical Analysis

## Chapter 3 - Observations & Result

3.1 Hemoglobinopathies & Thalassemias  
3.2 Geographical Distribution of Hemoglobin Disorders including thalassemia  
3.3 Risk of cousanguinity.  
3.4 Screening & Diagnostic Tests.  
3.5 Biochemical Analysis.  
3.6 Hemotapathology.  
3.7 Inheritance of β - thalassemia in different family.

## Chapter 4 - Discussion

4.1 Hamoglobinopathy & Thalassaemia.  
4.2 Geographical Distribution.  
4.3 Analysis of Screening & Diagnostic Test.  
4.4 Analysis of Hemotapathology.  
4.5 Biochemical Analysis.  
4.6 Ethonbiology.
Chapter 5 - Summary & conclusion

5.1 Review of hemoglobinopathies & thalassemias.
5.2 Review of geographical distribution of hemoglobin disorders including thalassemia.
5.3 Consanguineous.
5.4 Hematological analysis.
5.5 Biochemical analysis.
5.6 Ethnobiology.

Chapter 6 - Future Aspects

6.1 Wheat grass juice therapy
6.2 Blood transfusion
6.3 Iron chelation
6.4 Splenectomy
6.5 Bone marrow transplantation
6.6 Geue therapy
6.7 Stimulation of fetal hemoglobin synthesis
6.8 Genetic counseling
