ACKNOWLEDGEMENT

Words are the very poor substitutes to express one's emotional feeling. But then, there are no alternatives to give vent to one's sentiment particularly on an occasion like this. When one sits in acknowledging the debt of others this is too small a gesture compared to the imponderable help and cooperation which I received from my teachers, my fellow friends, relatives and well wishers.

With an overwhelming sense of legitimate pride and genuine obligation, I take this rare opportunity to express deep sense of gratitude to my research supervisor Dr. Sujata Chaudhuri, Professor, Department of Botany, University of Kalyani, Nadia, West Bengal, India and Dr. Srikanta Das, Professor, Department of Plant Pathology, Faculty of Agriculture, Bidhan Chandra Krishi Visvavidyalaya, Mohanpur, Nadia, West Bengal, India for showing me the light and steering me to the new direction in my academic life. My heartfelt thanks to both of them for steadfast encouragement, stimulating discussions, critical comments and inspiring guidance throughout the research investigations embodied in this thesis. Most importantly, they provided the environment where independent learning and execution of scientific problem is possible. All the works in this thesis is carried out under their supervision and I am indebted to them for propelling and keeping me in the right track of research.

I express my profound gratitude to the Dr. Sudipta Roy, Associate Professor and Head, Department of Botany, University of Kalyani and Dr. P. S. Nath, Professor and Head, Department of Plant Pathology, Faculty of Agriculture, Bidhan Chandra Krishi Visvavidyalaya and all the past Heads of the Departments during the tenure of my work for providing their valuable suggestions and keen interest during the course of investigation. Also I express warm regards to the all teachers and non-teaching staffs of the Department of Botany, University of Kalyani and thank them for giving me fruitful suggestions, effective recommendations and other academic help from time to time. I also thank all teachers and non-teaching staffs of the Department of Plant Pathology, Faculty of Agriculture, Bidhan Chandra Krishi Visvavidyalaya in this regard. I deem it my proud privilege to have opportunity to covey my sense of reverence to Prof. Basudeb Dasgupta, Prof. S.A.K.M. Kaiser.

I gratefully acknowledge my teachers, Lt. Dipak Chackraborty (English), Sri. Nanibhusan Chakraborty (Mathematics), Sri. Raboti Raman Acharya (Physics), Sri. Krishnendu Chackraborty (Chemistry) who taught me with extreme care during my school days.
Life in the lab would have been definitely mundane had it not been shared with my colleagues. To start with, I must thank Hemanta Dutta, Sathodru Pramanik, Tapati Das for being around all the time; be it while discussing academic or making fun and to all my fellow mates juniors and seniors who have contributed meaningfully apart from their intellectual stimulation.

I also convey my sincere thanks to my friends and accompanies in my locality-Naihati, Malay Dey, Malay Dasgupta, Sandip, Goutam, Sudip and Ajoy. Their joyful presence and helpful attitude made my life easier.

I owe a lot to my family members and close relatives whom I have been associated with since the days I did not know myself. Among them, my loving nephew Samadarshi Das Roy is noteworthy. It is my pleasure to acknowledge Sri Ramendra Nath Basu and also Smt. Smritikana Basu -now they are in mid eighties, but always encourages doing some good work. Also it is my great pleasure to acknowledge my mother in law, Smt. Tinku Basu. Their relentless support and co-operation helped me enormously to chase my dream.

Of course the two most important persons of my life - my parents (Sri. Shiba Prasad Das Roy and Smt. Kalpana Das Roy) deserve special mention for their wishes, support and unconditional love. They have contributed much more than I can say. I am overwhelmed having the scope to acknowledging them. Their sacrifice in all spheres of life, whether small or big and the way they have brought me up with the least amount of turbulence has made this dream of mine a reality.

There is one more person yet to be acknowledged. She is my wife, Smt. Ipsita Das Roy (Basu) - the best part of my everyday's life! Whether personal or in academics- I found him in every ups-and-downs of life. Her positive energy and strong influences never let me go out of the track.

Lastly I thank the great almighty, God, without whom nothing can be possible, which I believe.

Place: Kalyani, Nadia, WB  (Shirsendu Das Roy)
