ACKNOWLEDGEMENTS

I am heartily thankful to my supervisor, Prof. Vinod Pavarala, whose encouragement, guidance and support from the initial to the final level enabled me to develop, chart the course of my work and present the same in the current form.

I am thankful to the successive directors of the National Institute of Nutrition (NIN), Dr. Kamala Krishnaswamy, Dr. B. Sivakumar and Dr. B. Sesikeran for their constant encouragement.

The case studies presented in this thesis were carried out as different projects, which were supported by the National Institute of Nutrition (NIN), Hyderabad. I thank NIN, who kept me going without worrying about money or manpower.

I cannot thank enough, Dr. Purendra Prasad, Associate Professor, Sociology, University of Hyderabad, for his critical comments and timely inputs to strengthen the thesis. Thanks are also due to Prof. Anandhakrishnan of Theatre Arts Department for his few but thought provoking comments during the Doctoral Committee meetings.

I owe a great deal to Dr. T. Vijayapushpam, my colleague at NIN and a good friend, who has been kind enough to let me experiment in her projects dealing with nutrition education for adolescents.
The studies carried out with school children and on school curricula could not have been completed without the support and inputs from all the co-investigators, Dr. T Viajayapushpam, Dr. D. Raghunatha Rao, Mr. Anil Dube, Dr. Sarma, Dr. Grace Maria Anthony and Mr. Venkaiah.

Ajay Kumar of COVA has been very supportive in reaching the schools of the old city of Hyderabad for the study. He has exemplary dedication for the ‘field work’ and has been very inspirational.

I am deeply indebted to all the educational institutions, managements, teachers and most importantly the students for taking time off for me and nutrition education.

I express my sincere thanks to Mr. Sundararajulu and Mr. Laksmi Narayana of Food and Nutrition Board, Hyderabad for their time and patience. Mr. Sundara Rajulu’s ‘never-say-no’ spirit and dedication for nutrition education / communication was awe-inspiring.

It was indeed a very pleasant and memorable experience to interact with Mr. P.V. Satheesh at the Deccan Development Society (DDS), Pasthapur. I thank him for his time and patience. I am grateful to Dr. Salomeyesudas who gave me insights into the incredible work of DDS and shared quite a lot of literature. Her cheer and thoughtful comments lightened up our interactions.
My deepest regard to my senior colleagues at NIN for sharing their views on the nutrition education and communication activities of the Institute carried out in the last couple of decades and helping me draw objective inferences.

My special gratitude goes to Dr. T.C. Raghuram and Dr. K.V.R. Sarma, the past Heads of the Extension and Training Division, NIN as well as to Dr. G.N.V. Brahmam, the current HoD, for their encouragement.

The critical comments given by my colleague and friend Dr. Sudershan Rao were very helpful at various stages of writing the thesis. My thanks to him.

The invaluable support and help rendered by Mr. Rama Rao and other colleagues at NIN at various stages of my work, is gratefully acknowledged. I am also thankful to the staff in the Dean’s office at SN School for their help. Mr. Raghavan especially was very helpful in guiding me through the administrative formalities.

My wife Vijaya needs a great deal of appreciation for putting up with me during these maddening years and for constantly peping me up and telling me that I have it in me to complete this herculean task.

My love to my son Advait for being a good boy.

I owe everything to my parents without whose love, affection and blessings, I wouldn’t have even dreamt of attempting anything of this magnitude. A big ‘thanks’ to my father for chasing me to finish.
