ACKNOWLEDGEMENTS

I gratefully acknowledge my Research Supervisor Dr. Mohamad Yusuf for his advice, supervision and crucial contribution which made him a backbone of this research and so to this dissertation.

A special word of appreciation for ever so helpful, cooperative and encouraging attitude of Dr. Baldev Singh, Professor & Head, Department of Chemistry, for providing the necessary facilities.

I am highly thankful to Mr. Avtar Singh, RSIC, Panjab University, Chandigarh for providing the $^1$H-NMR and $^{13}$C-NMR spectra of the research samples.

I am also thankful to Dr. (Mrs.) P. P. Sahota, Department of Microbiology, P. A. U., Ludhiana for carrying out the antibacterial analysis of research samples.

The thesis could not have been completed without the love, support, continuous motivation and encouragement offered by my husband Mr. Manoj Kumar Vimal during this research work. I also wish to thank my loving daughter Deekshika Vimal.

Words alone are not sufficient to express my feeling about my immense gratitude that I owe to my dear parents and in laws family for their endless love, deep affection, heartfelt blessings and ever encouraging moral support.

Above all, I am grateful to God, Almighty who sustains this beautiful world and without whose grace nobody can ever succeed.

(Mamta Rani)
