## 1. PREAMBLE

1.1 Introduction to Braille

1.1.1 Braille dimension and types

1.1.2 Grades of Braille

1.2 Optical Braille Recognition system

1.2.1 Need for optical Braille recognition system

1.2.2 Functional units of optical Braille recognition

1.2.3 An overview of existing optical Braille recognition systems

1.3 Text To Speech synthesis system

1.3.1 Speech synthesis techniques

1.3.2 An overview of existing text to speech synthesis models for Indian languages

1.3.3 Approaches to duration modelling in a TTS system

1.4 Motivation and Objectives of the present research work

1.5 Problem specification

1.6 Specific Contributions

1.7 Scope of the work

1.8 Thesis Outline

## 2. BHARATI BRAILLE BANK

2.1 Bharati Braille

2.2 Review of existing datasets and need for Bharati Braille Bank
2.3 Braille Corpus design
   2.3.1 Braille Corpus Collection 25
   2.3.2 Braille document acquisition 26
   2.3.3 Braille document annotation and equivalent text generation 26
2.4 Structure of the Database 27
2.5 Corpus analysis 28
2.6 Comparison with the existing databases for English and Arabic Braille 32
2.7 Concluding Remark 33

3. BRAILLE DOT EXTRACTION TECHNIQUES 35
   3.1 Review of existing techniques for Braille dot extraction 35
      3.1.1 Image Pre-processing methods 35
      3.1.2 Thresholding methods 36
   3.2 Frequency domain filtering approach 37
      3.2.1 Methodology 37
      3.2.2 Unsharp Masking, High Boost Filtering and High Frequency Emphasis Filtering 45
      3.2.3 Result analysis: Sharpening frequency domain filters 47
   3.3 Spatial domain adaptive approach 57
      3.3.1 Generalized Bit-Plane slicing Algorithm 57
      3.3.2 Result Analysis: Adaptive bit-plane slicing technique 62
   3.4 Concluding Remark 70

4. INTER-POINT BRAILLE RECOGNITION THROUGH ADAPTIVE TEMPLATE APPROACH 72
   4.1 Overview of template based inter-point Braille recognition approach 72
   4.2 Issues in the traditional template based approach 74
   4.3 Adaptive template approach 76
      4.3.1 RGB image to Gray scale image conversion 76
      4.3.2 Extraction of dot patterns through adaptive bit-plane thresholding technique 78
4.3.3 Image Binarization 79
4.3.4 Connected component labelling using the eight connectivity property 79
4.3.5 Centroid extraction and alignment 82
4.3.6 Detection of dot with maximum number of eight connected pixels 87
4.3.7 Cropping to extract the dot with maximum number of eight connected pixels 88
4.3.8 Horizontal and vertical projection profile to find the height and width of the cropped dot 89
4.3.9 Design of adaptive mask 90
4.3.10 Threshold detection 92
4.3.11 Image separation 93

4.4 Result Analysis 94
4.5 Concluding Remark 111

5 ADAPTIVE BRAILLE RECOGNITION THROUGH A NOVEL DYNAMIC SEGMENTATION APPROACH 112

5.1 Issues in Adaptive template approach 112
5.2 Dynamic Segmentation Methodology 114
5.2.1 Braille Image Pre-processing 114
5.2.2 Segmentation of Recto and Verso dots 116
5.3 Result Analysis 120
5.4 Concluding Remark 126

6 ADAPTIVE BRAILLE TO TEXT RECOGNITION THROUGH TWO STAGE HISTOGRAM APPROACH 127

6.1 Issues in dynamic segmentation approach 127
6.2 Segmentation Methodology 129
6.2.1 Braille Image Pre-processing 131
6.2.2 Image De-skewing 132
6.2.3 Line Segmentation 133
6.2.4 Word Segmentation 137
6.2.5 Character Segmentation 139
6.2.6 Possible dot patterns in an Inter-point Braille 142
6.2.7 Two Stage Algorithm for differentiating the verso dots from recto dots in inter-point Braille 146
6.3 Issues and Remedies 152
6.4 Braille to text Conversion 155
   6.4.1 Adaptive Grid Construction 155
   6.4.2 Binary to Decimal Equivalent of a Braille Character 163
   6.4.3 Braille text to Hindi Text Transcription 165
6.5 Result Analysis 167
6.6 Concluding Remark 174

7. HINDI TEXT TO SPEECH SYNTHESIS SYSTEM 176
   7.1 Hindi Script 177
   7.2 Structure of Hindi syllables 178
   7.3 Issues in the existing Indian language TTS system 180
   7.4 Architecture of proposed Hindi TTS system 181
   7.5 Database Creation 182
   7.6 Text Processing 188
   7.7 Speech synthesis 196
   7.8 Result Analysis 197
   7.9 System Integration 205
   7.10 Concluding Remark 206

8. CONCLUSION AND FUTURE SCOPE 207
