ACKNOWLEDGEMENTS

I express my sincere gratitude to my research supervisor, Dr. M. Sukumar, Professor of Instrumentation Technology, S. J. College of Engineering, Mysore for accepting me as his student and providing me technical and moral support throughout the research work. He also encouraged me to gain research knowledge in the fields of MEMS, Bio-Medical Engineering, Sensors, etc. Certainly, this will help me for my future research.

I wish to express my profound gratitude to Dr. A.G. Ramakrishnan, Professor of Electrical Engineering, Indian Institute of Science, Bangalore for introducing me to the fascinating and challenging field of pattern recognition. He has given me an opportunity to work in his MILE Lab and encouraged me to work in his OHR research project by considering me as one of the member of MILE group. The technical discussions which I had with him and the facilities provided to me in his lab helped me a lot in meeting the research goal.

I sincerely thank the doctoral committee members; Dr. T. N. Nagabhushan, Dr. C. R. Venugopal, and Dr. Ravikumar for their valuable suggestions in further enhancing the technical contents of this thesis.

I am grateful to the concerned authorities of University of Mysore and UGC for sponsoring me a Teacher Fellowship to carry out this research work. I also thank the concerned authorities of S. J. C. E. for giving me an opportunity to work in their institution. I extend my thanks to both teaching and non-teaching faculty members of J.S.S. Research Foundation and S. J. C. E. for their support during my stay in their campus. Among these, I express special thanks to the entire faculty members of Department of Instrumentation Technology. I acknowledge Dr. M. Shivakumar, a research colleague of mine for his support during the period of research at S.J.C.E.

I take this opportunity to express my sincere gratitude to my parents Sri. N. S. Mahadevappa and Smt. Rathnamma. I extend my thanks to each and every member of our family and my in-law family. At this moment, I would like to remember the love and affection given by my grandmother Smt. Shardamma, my mother-in-law Smt. Sumithra, and my sister Smt. Renukamba, who are not with us to share the joy of completing the present work.
I sincerely acknowledge my wife Dr. Jayashree for her dedicated and moral support during the period of pursuing the present research work. I thank my daughter Nitya for her love and affection towards me. They have supported me a lot during my research work. They had enough patience to bear me for not spending sufficient time with them due to my busy engagement in the research and professional work.

The friendly and research environment due to all the members of MILE Lab, IISc, Bangalore was an encouraging and motive force for my research. The technical discussion I did with the research scholars and project fellow members of this lab was very fruitful. The research ideas shared with Dr. Suresh Sundarm, who was a Ph.D. scholar at MILE lab has given me additional input to the present research. I would like to remember Dr. Kasar, Dr. Ananth, Mr. Mohan, Mr. Venkatesth, Mr. Rituraj, Mr. Shahsikiran, Mrs. Lakshmi, Mrs. Shanthi, Ms. Nethra, and many others for their friendliness and support.

The experience of teaching to my students had helped me a lot in formulating new research ideas. Therefore, I take this opportunity to thank all my students. Finally, I am thankful to all those who have provided their handwritten data samples to carry out the present research work.

M Mahadeva Prasad
