ACKNOWLEDGEMENT

It is with immense pleasure that I take this moment to praise and thank all the people involved in my work directly or indirectly towards making this task a successful one.

First of all I would like to thank God, our creator, without whose love and guidance it would have not been possible for me to complete this big project and also for leading me all throughout my career as a student and fulfilling my prayers in achieving this goal.

I wish to express my deep sense of gratitude, to two most important person involved in the study, the first being none other than my supervisor Prof. Pardeshi Lal whose constant encouragement and advice in the study help to reach this objective and to my favourite teacher and co-supervisor Prof (Mrs) Veena Tandon, for her able guidance, keen interest, constant encouragement and patience throughout the course of my studies.

My sincere thanks to Prof. S. U. Ahmed, HOD, Department of Zoology, Nagaland University, for providing the laboratory facilities and his generosity in various ways.

My heartfelt thank goes to Prof. (Mrs) R. N. K. Horoo, the present Head of the Department, Department of Zoology, North-Eastern Hill University, Prof. S.B. Prasad the ex-head, for allowing me to use departmental facilities. I would also like to express my deep sense of gratitude to Prof. Sudip Dey of SAIF, NEHU, Shillong and Prof. T.C. Nag of A.I.I.M.S. (New Delhi), for electron microscopy.

I am also extremely grateful to Dr. B. Roy and Pramod Kumar Prasad for helping in the S.E.M photography. I also would like to thank my colleagues in the Parasitology Lab NEHU, for their help in various ways. I gratefully acknowledge the Ministry of Environment and Forests AICOPTAX project to Prof. V. Tandon for financial supports.

I would like to thank all my colleagues in Lumami for their concern and constant encouragement in the entire study period, especially Prof. N. S. Jamir HOD, Department of Botany. N. U. Hqs: Lumami, Nagaland, for providing the departmental facilities in the study. My sincere thanks to Dr. S. K. Chaturvedi, Dr. Nizo Puro and Dr. Abijet Boruah for their help, not only in photography but in various possible ways. I also would like to thank my colleague
Dr. Bendang. Walling, Dr. Alem. Jamir, Dr. Lanu. Longkumer, Dr. John Sema Dr. S. R. Hajong, Putuo and Rongpang for all the encouragement, concern and advice in the study.

My thanks to Chubawati, Hesheo, John Mao, Bendangwapang (Lect. Saochang College, Tuensang), S. Rajbongshi and all the friends who helped me in my entire stay in Shillong.

I am indebted to my cousin Supongwapang for all the trouble he underwent, so as to provide me with all the possible comfort in compiling the thesis in his cosy room, this also goes to Hannah, Naro and Naro for their constant prayers.

All of this would not have been materialised had it not been for the assistance from my trusted childhood friends who helped me throughout the field study and collection of specimens and for this, I acknowledge my friends Lima Aier, S. Meren, Lima Soyah, friends from Yisemyong and my cousin Bendang Kichuutzar for their help, support and encouragement.

I also would like to express my deep sense of gratitude to Mr and Mrs Chuba Jamir for providing financial assistance in the research work.

Lastly, I gratefully acknowledge the affection, advice, prayers and unflinching support of my wife, all my family members and my in laws which helped me in no small measure.

Place: Lumami
