Acknowledgements

I am highly indebted to The Almighty who has given me strength to accomplish this big task.

It is with deep sense of gratitude that I wish to place on record my sincerest thanks to my revered supervisor Dr. Kamaljit Singh, Professor, Department of Applied Chemical Sciences & Technology, Guru Nanak Dev University, Amritsar for his keen interest, constant encouragement, expert guidance, motivation and untiring efforts throughout the research work. I shall always cherish the memories of my association with him.

I am highly thankful to Head of the Department of Applied Chemical Sciences & Technology, Guru Nanak Dev University, Amritsar for providing necessary facilities for accomplishment of the research work.

I feel immense pleasure to express my sincere gratitude to Dr. Paramjit Kaur for providing invaluable assistance, support, moral courage and homely atmosphere during my stay in Amritsar.

I am also grateful to my lab-mates, faculty and non-teaching staff of Department of ACST for their generous support and co-operation.

Thanks are due to Professor R. S. Moreland, Department of Pharmacology and Physiology, Drexel University College of Medicine, Philadelphia, PA, USA, Professor Jan Balzarini, Rega institute for Medical Research, Katholieke Universiteit Leuven, Belgium and Professor Kelly Chibale, Department of Chemistry and Institute of Infectious Disease and Molecular Medicine, University of Cape Town, Rondebosch, South Africa for their association for conducting biological studies reported in this thesis.

Finally, I bow my head to my parents for their generous support, positive attitude, invaluable blessings, and selfless but untold sacrifices for my better & bright career. They were always there when I needed them and without their encouragement and understanding it would have been impossible for me to finish this work.

Kamaljit Singh
