

List of Plates

Plate No.	Descriptions
4.1.1	Plant, herbarium, fruit, flower and root of <i>Carissa carandas</i> L.
4.1.2	T.S of root, leaf and fruit of <i>Carissa carandas</i> L.
4.1.3	Powder analysis of root, leaf and fruit of <i>Carissa carandas</i> L.
4.2.1	Plant, herbarium, fruit, flower and root of <i>Carissa congesta</i> Wight
4.2.2	T.S of root, leaf and fruit of <i>Carissa congesta</i> Wight
4.2.3	Powder analysis of root, leaf and fruit of <i>Carissa congesta</i> Wight
4.3.1	Plant, herbarium, fruit, flower and root of <i>Carissa opaca</i> Stapf ex Haines
4.3.2	T.S of root, leaf and fruit of <i>Carissa opaca</i> Stapf ex Haines
4.3.3	Powder analysis of root, leaf and fruit of <i>Carissa opaca</i> Stapf ex Haines
4.4.1	Plant, herbarium, fruit, flower and root of <i>Carissa spinarum</i> L.
4.4.2	T.S of root, leaf and fruit of <i>Carissa spinarum</i> L.
4.4.3	Powder analysis of root, leaf and fruit of <i>Carissa spinarum</i> L.
5.1	Quantative studies of lupeol and β -sitosterol in root extract by HPTLC
5.2	Quantative studies of lupeol, β -sitosterol and naringin in leaves extract HPTLC
5.3	Quantative studies of lupeol and β -sitosterol in fruit extract HPTLC; qualitative studies of flavonoids and glycosides by HPTLC profiling
5.4	Comparative HPTLC profiling of Petroleum ether extracts of root, leaves and fruits of <i>Carissa sp</i>
5.5	Antibacterial studies of Methanolic root extracts of <i>Carissa sp</i>
5.6	Antibacterial studies of Ethanolic root extracts of <i>Carissa sp</i>
Fig: I	Quantitative estimation of Secondary Metabolites
Fig II:	Quantitative measures of standards β -Sitosterol and Lupeol and Naringin
