LIST OF TABLES

Table No. 1: List of species of AM fungi found in rhizosphere soil of Tomato on 60th and 90th day from three localities

Table No. 2: List of AM fungi isolated from the non rhizosphere soil from the three localities

Table No. 3: Number of species of AM fungi isolated from rhizosphere soil of tomato from three localities

Table No. 4: Number of AM propagules per 100 g rhizosphere soil and percentage root colonization of tomato from three localities during rainy season

Table No. 5: Number of AM propagules / 100 g rhizosphere soil and percentage root colonization of tomato from three localities during winter season

Table No. 6: Number of AM propagules / 100 g rhizosphere soil and percentage root colonization of tomato from three localities during summer season

Table No. 7: Study of physicochemical parameters of rhizosphere soil of tomato from three localities

Table No. 8: Effect of AM fungi on growth responses of tomato plants

Table No. 9: Effect of AM fungi on growth responses and yield of Tomato

Table No. 10: Effect of mycorrhiza on the Growth Vigor Index

Table No. 11: Effect of mycorrhiza on chlorophyll content in leaves of tomato

Table No. 12: Effect of mycorrhiza on the DNA of tomato leaves

Table No. 13: Effect of mycorrhiza on the protein content of tomato leaves

Table No. 14: Effect of mycorrhiza on the protein of green and red tomatoes

Table No. 15: Effect of mycorrhiza on the total carbohydrates of leaves

Table No. 16: Effect of mycorrhiza on total carbohydrates in green and red fruits

Table No. 17: Effect of mycorrhiza on reducing sugars in the leaves
**Table No. 18:** Effect of mycorrhiza on reducing sugars in the green and red fruits

**Table No. 19:** Effect of mycorrhiza on peroxidase and polyphenol oxidase in leaves of tomato

**Table No. 20:** Effect of mycorrhiza on acid and alkaline phosphatase in leaves of tomato

**Table No. 21:** Effect of mycorrhiza on acid and alkaline phosphatase of green fruits

**Table No. 22:** Effect of mycorrhizal on the acid and alkaline phosphatase of red fruits

**Table No. 23:** Effect of mycorrhiza on ascorbic acid content in the green and red fruits

**Table No. 24:** Effect of mycorrhiza on the phenols in the leaves

**Table No. 25:** Effect of mycorrhiza on the phenols in the green and red fruits

**Table No. 26:** Effect of mycorrhiza on the lycopene content of red fruits
