ACKNOWLEDGEMENTS

The Ph.D. study is an exciting journey which takes many years to complete. During these exciting and stimulating times, I was accompanied by a group of people who supported me in multiple ways and without whom I am sure I would have gotten lost along the way.

My expression of gratitude, firstly, must go to my research supervisor Dr. J. Pramoda Kumari for her excellent guidance in helping me through completion of my Doctoral degree. Mam, you have given me space in achieving what I have completed at Sri Venkateswara University to date, and also given me a push in the right direction when it has been needed, I thank you very much.

I am very grateful to Prof. Devarajulu M, Registrar, S.V. University, for his support in each and every aspect.

My special thanks go to Prof. C.H. Appa Rao, Head, Department of Biotechnology; Prof. K. Thyagarajulu, Chairman, Board of studies and Dean and Principal, K. Yellamma, SVU College of Sciences.

To Sreenivasulu Y (Watson life sciences), your help with all aspects of lab work has been greatly appreciated especially in relation to RAPD and expression analysis work.

Special thanks must also be given to my lab members that I have had the privilege of working with, namely Chandrasekhar K, Preeti S, Lebona Esther D, Prasad CH, Sandya K, Sandhya Priya P and Sreedevi B for providing a relaxed lab environment to work in. Thanks to teaching and non teaching staff of Departments of Biotechnology and Microbiology.

I also want to thank everyone who assisted me, whose names are too many to list, whether it was with field work, laboratory assistance and/or simple transportation to and from the university, I deeply appreciate your efforts.

Finally, I’d like to acknowledge my friends and family. You have always helped me push for success which I will always be grateful for.
