Aims of Study
AIMS OF STUDY

➢ To evaluated the prevalence of H. pylori in perforated peptic ulcer by obtaining antral mucosal biopsy with use Endoscopy in post operative period; whenever possible; by using biopsy urease test.

➢ Possible cause of ulceration / precipitation of Perforation.

OTHER PARAMETERS WILL BE STUDIED.

➢ Age distribution of peptic perforation.
➢ Sex distribution of H. Pylori in peptic perforation.
➢ Associated disease – TB, IHD, ARF, DM, HTN.
➢ Size of perforation in millimeters.
