# CONTENTS

## CHAPTER I INTRODUCTION

1.1 Stress: Its Theoretical Shades 01  
1.2 Stress: Its Empirical Status 04  
1.3 Stress: The Coping Strategies 48  
1.4 The Present Study: Its Rationale 97

## CHAPTER II PROBLEMS AND HYPOTHESES

2.1 Problems: Their Statement 103  
2.2 Variables: Their Specification 105  
2.3 Hypotheses: Their Formulation 142

## CHAPTER III METHODOLOGY

3.1 Universe and Sample 149  
3.2 Tools and Techniques 151  
3.3 Research Design 165  
3.4 Data Collection 165  
3.5 Scoring 166

## CHAPTER IV ANALYSES AND INTERPRETATION

4.1 Variables: Their Statistical Properties 168  
4.2 Hypotheses: Their Verification 172  
4.3 Discussion 221
CHAPTER V SUMMARY 246-263

5.1 Summary 246

5.2 Conclusions 249

5.3 Delimitations 260

5.4 Limitations 262

5.5 Suggestions for further Research 263

REFERENCES 264-305

APPENDICES
LIST OF TABLES

Table 1 : Particulars of the sample. ................................. 150
Table 2 : Results of Item analysis. .................................. 156
Table 3 : Split-half reliability coefficients. ...................... 157
Table 4 : Validity through ANOVA (repeated measures design) of Ambitious type persons scores. ...................... 159
Table 5 : Validity through ANOVA (repeated measures design) of Fussy type persons scores. ................................. 160
Table 6 : Ambitious type compared with Fussy type with respect to their preference for stress coping devices. ............... 161
Table 7 : Statistical Properties of the variables ................. 170
Table 8 : One way (repeated measures) ANOVA of the coping devices scores of the extraverts. ................................. 174
Table 9 : One way (repeated measures) ANOVA of the coping devices scores of the introverts. ................................. 175
Table 10: Comparison between extraverts and introverts with respect to the magnitudes of coping devices.

Table 11: One way (repeated measures) ANOVA of the coping devices scores of the high N persons.

Table 12: One way (repeated measures) ANOVA of the coping devices scores of the low N persons.

Table 13: Comparison between high and low N scorers with respect to the magnitudes of coping devices.

Table 14: One way (repeated measures) ANOVA of the coping devices scores of the high P persons.

Table 15: One way (repeated measures) ANOVA of the coping devices scores of the low P persons.

Table 16: Comparison between high and low P scorers with respect to the magnitudes of coping devices.

Table 17: One way (repeated measures) ANOVA of the coping devices scores of the high Intelligent persons.

Table 18: One way (repeated measures) ANOVA of the coping devices scores of the low Intelligent persons.

Table 19: Comparison between high intelligence scorers and low intelligence scorers with respect to the magnitudes of coping devices.
Table 20: One way (repeated measures) ANOVA of the coping devices scores of Women.

Table 21: One way (repeated measures) ANOVA of the coping devices scores of the Men.

Table 22: Comparison between male and female entrepreneurs/business owners with respect to the magnitudes of coping devices.

Table 23: One way ANOVA (repeated measures) of the coping devices scores of the Vaishyas.

Table 24: One way ANOVA (repeated measures) of the coping devices scores of Gujratis.

Table 25: One way ANOVA (repeated measures) of the coping devices scores of Sindhis.

Table 26: One way ANOVA (repeated measures) of the coping devices scores of Punjabis.

Table 27: One way ANOVA (repeated measures) of the coping devices scores of South Indians.

Table 28: One way ANOVA (repeated measures) of the coping devices scores of Others.

Table 29: One way ANOVA (repeated measures) of the coping devices scores of entrepreneurs of no-business history.

Table 30: One way ANOVA (repeated measures) of the coping devices scores of business history persons.
Table 31: One way ANOVA (repeated measures) of the coping devices scores of Small scale industries.

Table 32: One way ANOVA (repeated measures) of the coping devices scores of Large and medium scale industries.

Table 33: Relation of E with coping devices.

Table 34: The moderating effects of Demographic variables upon the relationship between E and coping devices.

Table 35: Relation of N with coping devices.

Table 36: The moderating effects of Demographic variables upon the relationship between N and coping devices.

Table 37: Relation of P with coping devices.

Table 38: The moderating effects of Demographic variables upon the relationship between P and coping devices.

Table 39: Relation of IQ with coping devices.

Table 40: The moderating effects of Demographic variables upon the relationship between Intelligence and coping devices.

Table 41: Intercomparisons among various Caste groups of the Male entrepreneur/business owners pertaining to TD.
Table 42: Intercomparisons among various Caste groups of the Male entrepreneur/business owners pertaining to DO.

Table 43: Intercomparisons among various Caste groups of the Male entrepreneur/business owners pertaining to AO.

Table 44: Comparison between Male with Business History and without Business History to their magnitudes of coping devices.

Table 45: Comparison between small and large medium scale male industrialists pertaining to their magnitudes of coping devices.
