Acknowledgments

Words would not suffice to record my deep sense of gratitude to my thesis supervisor, guide, and mentor Prof. M. Harisankar. Without whose constant encouragement, vision and wisdom, this work would not have completed. He was always a constant source of inspiration, end-less reservoir of energy and held the torch of knowledge to show me the correct path, whenever I faltered. I owe him very much for his patience and wisdom. My co-guide Prof. M. Ramachandra Kaimal inspired me throughout the course of this research activity. He was instrumental in providing many valuable suggestions, which saved me many hours. I thank both of them for the time and energy they spared for me.

I had the fortune of getting constant encouragement from two eminent researchers: Prof. Sakuntala S. Pillai and Dr. P. P. Mohanlal. I thank Dr. Sakuntala Pillai for providing me many a times information on general topics as well as for helping me to attend various conferences. I had several hours of technical discussions with Dr. P. P. Mohanlal, who despite his very busy work schedule, was always ready to clear my technical queries. I express my gratitude to both of them.

My former colleague Mr. Suresh Kumaraswamy had helped several times in getting me the necessary literature on request through e-mail. My old undergraduate classmate and friend of several years, Dr. G. Abhilash of NIT Kozhikode did share some of his vast expertise on several topics, which helped me a lot. I thank both of them for their help and friendship.

Finally, I wish to place on record, the constant support I received from my family including my wife Sobha and daughters Anuja and Aabha during the entire course of the work. A special word of thanks is very much due to my uncle Shri. T. G. Krishnankutty, who carefully proof read the entire thesis.

And as always, I thank the God Almighty, for giving me the strength to pursue this research, amidst my teaching assignments.

Raveendranathan K. C.
