Acknowledgement

During my past few years, I have always realized that there are many people who have directed, assisted and supported me during my Ph.D. study. Without them I would never be able to make to this point. I express my special gratitude to everyone who rendered a helping hand for the successful realization of the thesis and also I would like to express my apology that I could not mention them personally one by one.

With deep sense of gratitude, I would like to thank my guide and supervisor Dr. M. Abdul Khandar, Professor and Honorary Director, Centre for Nanoscience and Nanotechnology, Kariavattom Campus, University of Kerala, Thiruvananthapuram for his tremendous effort in guiding, helping and encouraging me during my Ph.D period. His expert guidance, perpetual encouragement and parental care throughout my years of study will always be appreciated with my whole heart.

I express my sincere thanks to Dr. G. Renuka, Professor and Head, Department of Physics, University of Kerala, Dr. V. K. Vaidyan and Dr. S. R. Prabhakaran Nair, former Heads, Department of Physics, University of Kerala for providing rational support and for extending facilities to carryout my research work.

I am deeply indebted to my dear colleagues Rajeev. R. Prabhu and Sarvana Kumar S., for the immense support, care and help rendered by them.

I am deeply indebted to Dr. A. Gupta, Dr. V. R. Reddy, Dr. V. G. Sathe and Dr. V. Ganesan, Scientists, UGC-DAE Consortium for Scientific Research, Indore for providing experimental facilities.

I acknowledge Kerala State Council for Science, Technology and Environment, Government of Kerala for the financial support provided in the form fellowship through an SRS project.

I would like to extend my sincere gratitude to Mr. V. M. Anandakumar, Department of Physics, Mahatma Gandhi College, Thiruvananthapuram and Dr. R. Madhusoodanan Nair, College of Engineering, Chengannur for their continuous encouragement, moral support, and unconditional love. Affection and friendship given by Dr. A. Devarajan, Department of Physics, St. Gregarious College, Kottarakkara and Mr. John Jacob, Department of Physics, University of Kerala, Thiruvananthapuram is thankfully remembered.

I express my sincere thanks to all the people in the Department of Physics, University of Kerala, including all professors, lecturers, office staff and my fellow graduates, for providing such a joyful studying and working environment.

I wish to record sincere thanks to The Head and staff of Sophisticated Test and Instrumentation Centre, Cochin University Campus for recording X-ray diffraction pattern. The service rendered by DST unit on Nanosciences, IIT Madras, Chennai for HRTEM measurements is duly acknowledged. I am also thankful to the scientists and staff of Laboratory for Polymer Analysis,
Sree Chithira Thirunal Institute for Medical Sciences and Technology for recording FTIR and UV-Visible spectra.

During my research period, I have extensively made use of the literature available in a number of libraries. Library, Department of Physics, the Campus library, Kariavattom campus, University library, palayam, University of Kerala, J R D Tata library, Indian Institute of Science, Bangalore are the important libraries that I have visited during my Ph. D programme. I extend my sincere gratitude to the staff of the respective libraries for their generous help.

Heartfelt gratitude to my wife, for providing all the help I needed to complete this work. She was always there with me, for lighting my spirit up and keeping my heart warm.

With heartfelt gratitude I would like to thank my parents and brothers, my strength and the reason I become who I am, whose endless love and encouragement have supported me through all the happiness, sadness, high and low, and for always being there for me whenever I needed them and always believing in my abilities.

Finally, I express my heartfelt thanks to Lord Almighty for His blessings.

MOHAMED SHANID N. A.
