Aims and Objectives
Aims and Objectives

1. To diagnose the cases of malaria.
2. To evaluate the sensitivity and specificity of immunochromatographic test (ICT malaria pf / pv) for plasmodium falciparum and plasmodium vivax in relation to thick and thin blood smear examination under light microscope.
3. To differentiate plasmodium falciparum and plasmodium vivax.
4. To evaluate post treatment sensitivity of immunochromatographic test (ICT malaria pf / pv) for plasmodium falciparum and plasmodium vivax.
