ACKNOWLEDGEMENT

Research is a continuous process undertaken by an individual or a team of persons probing into the never ending, newer avenues of arts. Many people known and unknown have contributed to the strengths of the thesis. It is the matter of pride and elation for me to acknowledge the contribution of those individuals who have been inspirational, supportive and helpful throughout my work, and endowed me most precious knowledge to see success in my endeavour. I take this opportunity to convey my gratitude to one and all who supported me in the completion of this project.

In the first place I would like to record my gratitude to my supervisor and guide Dr. Varsha J. Patel, Professor and Head, Department of Pharmacology, Smt. NHL Municipal Medical College, Ahmedabad, for her consent, motivation and suggestions. Above all the most needed, she provided me unflinching encouragement and support in various ways. Her truly artistic intuition has made her as a constant oasis of ideas and passions in research, which exceptionally inspire and enrich my growth as a student and researcher. I am indebted to her more than she knows.

With profound pleasure, I express my deepest gratitude for her erudite guidance, timely suggestions, unflinching encouragement, motherly love and critical remarks for the entire span of my work. Her involvement and her originality has triggered and nourished my intellectual maturity that I will benefit from, for a long time to come. Her perpetual energy and enthusiasm in research had motivated all her advices including me. In addition, she was always accessible and willing to help me with our research. She has been a pillar of strength and support without whom would not have been brought to completion.
I am extremely thankful to all the Medical Officers, Doctors and Supporting Staff members of each health care facility for their kind support and cooperation during patients data collection.

I express my special thanks to Dr Norul Badriah Hassan, Department of Pharmacology, School of Medical Sciences, University Sains Malaysia, developer of PQI tool, for providing PQI manual and valuable guidance and encouragement.

I do feel, highly dedicated in manifesting a sense of gratitude to my honorable principal, Dr. R H Parikh, who permits me do this project and showers his blessing and also for constant help throughout the course of my thesis.

I express my special thanks to Dr. Hemant Tiwari from Department of Community Medicine who directly and indirectly helped me for the success of this work.

I express my heartiest regards to my husband, Vashisht and my beloved parents for their energetic, moral and economical support that boosted my spirits. It is because of them I have reached the place where I am today. I am very much thankful to my brother for his moral support, constant encouragement and patience absolutely needed to complete my entire study. I am also very much thankful to my cute daughter, Tithi whose love and indirect motivation has brought me so far in my life.

From the deepest core of my heart and soul, I am highly grateful to God. My greatest regards to the Almighty for bestowing upon me the courage to face the complexities of the life and complete this thesis work successfully.
