CONTENTS

1. 

Chapter I 

General Introduction; 

Literature Review on 

(i) Magnetic Measurements  
(ii) Electronic Spectral Studies  
(iii) Infrared Spectral Studies  
(iv) References  

Pages 1 - 39

2. 

Chapter II 

(i) Physical Measurements and methods of calculation  
(ii) References  

Pages 40 - 50

3. 

Chapter III 

(i) Preparation and Characterisation of ligands  
(ii) References  

Pages 51 - 58

4. 

Chapter IV 

(i) Structural Studies on High spin Octahedral Iron(III) complexes with Schiff bases derived from substituted Salicylaldehyde and O-amino benzophenone.  
(ii) References  

Pages 59 - 79
5. **Chapter V**

(i) Stereo Chemical Studies on Octahedral and square planar complexes of Copper(II), Manganese(II) and uranyl(II) with 2:5 - Dimethoxyphenyl glyoxal thiosemicarbazone and 4-p-methoxy phenyl thio semicarbazone of 2:5 Dimethoxy phenyl glyoxal.

(ii) References.

6. **Chapter VI**

(i) Magnetic and Spectroscopic studies on cubic high spin Ni(II) and Co(II) complexes with O,N,S - donor atoms.

(ii) References

7. **Chapter VII**

(i) Synthesis and Structural Studies of some Tri- and Di-Valent Cr(III), Mn(III), Co(III), and VO(II) complexes of Schiff Bases.

(ii) References

8. **Chapter VIII**

(i) Biocidal activity of some compounds

(ii) References
