3.6 Soil map of Varada river lower basin

3.7 Subsurface geology map of Varada river lower basin (As fence diagram)

4.1 Annual isohyetal map of Varada river lower basin (in mm)

4.2A Mean monthly rainfall of 19 stations

4.2B Mean monthly number of rainy days of 19 stations

4.3 Draught and excess rainfall pattern for the Varada river lower basin area

4.4 Average monthly water balance graph of Varada river lower basin

4.5 Climatological relations of the area

4.6 Relationship between rainfall and discharge in Varada river lower basin

5.1 Idealised cross section of open wells in Varada river lower basin

5.2A Histograms for depthwise distribution of borewells in Varada river lower basin

5.2B Histograms for variation of yield of borewells in Varada river lower basin

5.3 Relation between depth and yield of borewells in Varada river lower basin

5.4 Grid-deviation water table map of Varada river lower basin

5.5 Hydrographs of selected observation wells of Varada river lower basin

5.6 Hydrographs of observation wells and rainfall of the area

5.7 Locations of aquifer studies in Varada river lower basin

5.8 Slichter method for determining the specific capacity (C) at well No.11
5.9 Figure showing specific capacity Vs recovery time
5.10 Relationship between cross sectional area and specific capacity of the wells
5.11 Graph of residual drawdown Vs time ratio for recovery test analysis by Theis recovery method of well No. 11
5.12A Relationship between depth of wells and transmissivity
5.12B Relationship between cross sectional area and transmissivity
5.13 Time Vs drawdown curve (Mishra et al, method)
5.14 Plots showing the variation of residual drawdown (S) with the time since pumping stopped (t) for yield test
5.15 Plot of residual head Vs elapsed time (After Cooper et al, 1967)
5.16 Slug test analysis (After Cooper et al, 1967)
6.1 Water sample location map of Varada river lower basin
6.2 Relation between electrical conductivity to TDS cations and anions
6.3 Hydrochemical facies of groundwater (Back, 1965)
6.4 Hill-Piper Trilinear diagram for chemical classification of water
6.5A Change of rMg/rCa in groundwater flow direction of Varada river lower basin
6.5B Change of SAR in groundwater flow direction of Varada river lower basin
6.6 Schoeller index map of Varada river lower basin
6.7 Classification of irrigation water (U.S.S.L. - 1953) 163
6.8 Wilcox classification diagram for suitability of irrigational water 167
6.9 Mechanisms controlling the chemistry of groundwater 168
6.10 Corrosive zones of Varada river lower basin 170
7.1 Botanical map of Varada river lower basin 181
7.2 Phreatophytes of Varada river lower basin 184
7.3 Correlation between sounding results and borehole litholog 197
8.1 Figures showing various interpretation techniques 210
8.2 VES curves, geoelectric and lithological logs 215
8.3 Map showing locations of VES, test wells, geoelectrical cross sections, profilings, exploratory and RVES sites in Varada river lower basin 221
8.4 A, B & C Iso-apparent resistivity contour map of VRLB fo AB/2 75 ft, 100 ft and 150 ft 222
8.5 Longitudinal conductance map of Varada river lower basin 226
8.6 Transverse resistance map of Varada river lower basin 226
8.7 VES curves with resistivity and lithologs 228
8.8 Depth to basement in Varada river lower basin 231
8.9 A-F Geoelectric cross sections
8.10 A & B Resistivity profiles at Kyasanur and Kanavally
8.11 la-12a Polar diagrams
8.11 lb-12b Variation of Aa (degree of fracturing) with depth
8.12 VES curves, borehole litholog and resistivity log
8.13 Spontaneous potential, short normal and lateral logs with borehole lithologs
9.1 Potential and corrosive groundwater zones of Varada river lower basin

TABLES
2.1 Areal extent of the major physiographic units of VRLB
2.2 Potential groundwater zones of VRLB
2.3 Morphometric parameters of VRLB
2.4 Quantitative parameters of VRLB
2.5 Density of source heads of VRLB
2.6 Density of confluence points of VRLB
2.7 Drainage basin classification of Strahler
2.8 Slope analysis of the VRLB
3.1 Classification of Radhakrishna
3.2 Classification of Swaminath and Ramakrishnan (1981) and Naqvi (1981)
3.3 Stratigraphic sequence in VRLB
4.1 Average distribution of rainfall during different seasons
4.2 Mean monthly rainfall and number of rainy days of stations for the period 1978-1987 82
4.3 Effective monsoon rainfall of VRLB 84
4.4 Draught and excess rainfall analysis for the period 1978-1987 86
4.5 Individual stations studies (considered with their ten years average rainfall) 87
4.6 Climatological parameters of VRLB 89
4.7 Stream discharge of VRLB 92
5.1 Grid deviation of average water levels in VRLB 101
5.2 Recovery data of well No. 11 109
5.3 Results of recovery test (Well No.11) 109
5.4 Well characters of VRLB 111
5.5 Aquifer parameters of large diameter wells of VRLB 113
5.6 Aquifer parameters of wells from VRLB (After Mishra and Chachadi, 1985) 118
5.7 Results of yield test on openwells 123
5.8 Slug test data analysis 125
5.9 Transmissivity coefficient as determined from slug test 125
5.10 Water budgeting (After Thornthwaite and Mathur 1955) 133
5.11 Water budgeting (After Basappa Reddy, 1977) 133
5.12 Well parameters for VRLB 133
6.1 Groundwater chemistry of Varada river lower basin 140
6.2 Classification of the VRLB wells based on electrical conductivity (After Sarma et al, 1982) of water 140
6.3 Carrol's classification of groundwaters of VRLB
6.4 Statistical parameter of constituents of groundwaters in VRLB, A-Greywacke and B-Biotite schist
6.5 Range of hardness recommended by USGS
6.6A Correlation between EC and cations and anions
6.6B Correlation matrix for the groundwater samples from greywacke region of VRLB
6.6C Correlation matrix for the groundwater samples from biotite schist region of VRLB
6.7A Chemical classification of water (After Hem, 1975)
6.7B Different chemical types of groundwater occurring in the area (Based on Hem's classification)
6.8 Hydrochemical facies of VRLB (Based on Back's classification)
6.9 Chemical compositions of groundwater in the Hill-Piper Trilinear diagram
6.10 Relation between rMg/rCa, SAR and groundwater flow direction
6.11 Different chemical parameters of groundwater of VRLB
6.12 Classification of groundwater (Schoeller)
6.13 Comparison of chemical concentration of groundwater of VRLB with ICMR and WHO standards for drinking water
6.14 Irrigational suitability of groundwaters of VRLB
6.15 Soluble sodium percentages in groundwaters of VRLB
