ACKNOWLEDGEMENT

The author wishes to express his deep gratitude to his research guide Prof. S. S. Ramakrishnan, Head, Department of Metallurgical Engineering, PSG College of Technology for his inspiring, creative and painstaking guidance throughout the course of this work. His excellence in analysing and discussing the problem with apt solution has contributed a lot to the successful completion of this investigation.

The author is highly grateful to the Management of the PSG College of Technology, Coimbatore in particular Mr. G. R. Karthikeyan, Managing Trustee, Mr. C. R. Swaminathan, Chief Executive, and Prof. P. Radhakrishnan, Principal, for providing necessary facilities for the research, and for their encouragement.

The author owes much to Prof. P. C. Angelo, Head of Metallurgy Research Centre, whose interest and advice have always been a source of enlightenment and support.

The author takes pleasure in thanking his colleagues Prof. M. Sundar, Mr. P. Gopalakrishnan, Mr. R. Subramanian, Mr. V. Balusamy, and Mr. B. Ravishankar and to many graduate students for their helpful suggestions and assistance during the course of this work.

The author is thankful to Prof. P. V. Mohanram, Prof. K. Natarajan, Prof. S. Gopalasubramanian, and Mr. A. R. Lakshmanan of Mechanical Engineering Department for their guidance in surface roughness measurement and support during the course of this work.

The author is thankful to Prof. N. K. Srinivasan, Director, CASSA Bangalore, Prof. S. Seshan of Indian Institute of Science Bangalore, and Prof. B. K. Muralidhara of U. V. C. E. College of Engineering Bangalore, for their advice and guidance.
The author is extremely grateful to Mr. A.V. Rajasekara Rao, PSG & Sons Metallurgy and Foundry Division, Neelambur and Mr. K. Jayabal Vice Chairman Autoshell Casts Private Limited, Coimbatore for permission to use the facilities to carry out the work.

The author expresses his sincere thanks to Dr. S. Baldev Raj, Director Metallurgy and Materials Group, Indira Gandhi Centre for Atomic Research, Kalpakkam, Dr (Mrs) S. Vijayalakshmi, Scientist and Mr. P. Shankar, Scientist IGCAR for giving permission to use their SEM and EDAX facilities during the course of this work.

The author is thankful to the Director of DMRL Hyderabad and Mrs Vaidehi Joshi-Scientist SEM Division DMRL, Hyderabad for their help during the various stages of SEM work.

The author is thankful to the Director SITRA, Coimbatore and Professor-In-Charge of Sand analysis Laboratory of Tamil Nadu Agricultural University, for chemical analysis of sand samples.

The author is highly grateful to Mr. A. Chandrasekar, Mr. S. Kuttumani (Draughtsman), Mr. Madalaimuthu (Photographic work), Mr. S. Kumarasamy, Mrs. K. Hemalata, and Mr. Anburaj, Mr. Thillairajan Research Associates, for their timely help in the preparation of this thesis.

The author affectionately acknowledges the contribution of his wife Mrs. M. Asma Nazirudeen and his daughters Miss. S. M. Haseena Banu and Miss S. M. Reseeya Banu for their encouragement, moral support and patience in cheerfully putting up with many inconveniences during the course of this investigations.
