</table>
4.12. Hydraulic conductivity ratio for different fly ash matrices. 90

5.1. pH values of fly ash matrices. 94

5.2. Concentration of heavy metals in water used. 95

5.3. Allowable and threshold limits for concentration of metals. 96

5.4. Concentration of metals in leachates of unstabilized compacted fly ash matrix, 7 days curing at OMC_{dry}. 97

5.5. Concentration of metals in leachates of unstabilized compacted fly ash matrix, 7 days curing at OMC. 97

5.6. Concentration of metals in leachates of unstabilized compacted fly ash matrix, 14 days curing at OMC_{dry}. 98

5.7. Concentration of metals in leachates of unstabilized compacted fly ash matrix, 14 days curing at OMC. 98

5.8. Concentration of metals in leachates of unstabilized compacted fly ash matrix, 28 days curing at OMC_{dry}. 99

5.9. Concentration of metals in leachates of unstabilized compacted fly ash matrix, 28 days curing at OMC. 99

5.10. Concentration of Chromium in leachates of stabilized matrices, 7 days curing at OMC_{dry}. 101

5.11. Concentration of Chromium in leachates of stabilized matrices, 7 days curing at OMC. 101

5.12. Concentration of Chromium in leachates of stabilized matrices, 14 days curing at OMC_{dry}. 102

5.13. Concentration of Chromium in leachates of stabilized matrices, 14 days curing at OMC. 102

5.14. Concentration of Chromium in leachates of stabilized matrices, 28 days curing at OMC_{dry}. 103

5.15. Concentration of Chromium in leachates of stabilized matrices, 28 days curing at OMC. 103

5.16. Concentration of Copper in leachates of stabilized matrices, 7 days curing at OMC_{dry}. 106

5.17. Concentration of Copper in leachates of stabilized matrices, 7 days curing at OMC. 106
5.18. Concentration of Copper in leachates of stabilized matrices,
14 days curing at OMC\textsubscript{dry}. 107

5.19. Concentration of Copper in leachates of stabilized matrices,
14 days curing at OMC. 107

5.20. Concentration of Copper in leachates of stabilized matrices,
28 days curing at OMC\textsubscript{dry}. 108

5.21. Concentration of Copper in leachates of stabilized matrices,
28 days curing at OMC. 108

5.22. Concentration of Iron in leachates of stabilized matrices,
7 days curing at OMC\textsubscript{dry}. 111

5.23. Concentration of Iron in leachates of stabilized matrices,
7 days curing at OMC. 111

5.24. Concentration of Iron in leachates of stabilized matrices,
14 days curing at OMC\textsubscript{dry}. 112

5.25. Concentration of Iron in leachates of stabilized matrices,
14 days curing at OMC. 112

5.26. Concentration of Iron in leachates of stabilized matrices,
28 days curing at OMC\textsubscript{dry}. 113

5.27. Concentration of Iron in leachates of stabilized matrices,
28 days curing at OMC. 113

5.28. Concentration of Lead in leachates of stabilized matrices,
7 days curing at OMC\textsubscript{dry}. 116

5.29. Concentration of Lead in leachates of stabilized matrices,
7 days curing at OMC. 116

5.30. Concentration of Lead in leachates of stabilized matrices,
14 days curing at OMC\textsubscript{dry}. 117

5.31. Concentration of Lead in leachates of stabilized matrices,
14 days curing at OMC. 117

5.32. Concentration of Lead in leachates of stabilized matrices,
28 days curing at OMC\textsubscript{dry}. 118

5.33. Concentration of Lead in leachates of stabilized matrices,
28 days curing at OMC. 118

5.34. Concentration of Manganese in leachates of stabilized matrices,
7 days curing at OMC\textsubscript{dry}. 121
5.35. Concentration of Manganese in leachates of stabilized matrices, 7 days curing at OMC.

5.36. Concentration of Manganese in leachates of stabilized matrices, 14 days curing at OMC
dry.

5.37. Concentration of Manganese in leachates of stabilized matrices, 14 days curing at OMC.

5.38. Concentration of Manganese in leachates of stabilized matrices, 28 days curing at OMC
dry.

5.39. Concentration of Manganese in leachates of stabilized matrices, 28 days curing at OMC.

5.40. Concentration of Nickel in leachates of stabilized matrices, 7 days curing at OMC
dry.

5.41. Concentration of Nickel in leachates of stabilized matrices, 7 days curing at OMC.

5.42. Concentration of Nickel in leachates of stabilized matrices, 14 days curing at OMC
dry.

5.43. Concentration of Nickel in leachates of stabilized matrices, 14 days curing at OMC.

5.44. Concentration of Nickel in leachates of stabilized matrices, 28 days curing at OMC
dry.

5.45. Concentration of Nickel in leachates of stabilized matrices, 28 days curing at OMC.

5.46. Concentration of Zinc in leachates of stabilized matrices, 7 days curing at OMC
dry.

5.47. Concentration of Zinc in leachates of stabilized matrices, 7 days curing at OMC.

5.48. Concentration of Zinc in leachates of stabilized matrices, 14 days curing at OMC
dry.

5.49. Concentration of Zinc in leachates of stabilized matrices, 14 days curing at OMC.

5.50. Concentration of Zinc in leachates of stabilized matrices, 28 days curing at OMC
dry.

5.51. Concentration of Zinc in leachates of stabilized matrices, 28 days curing at OMC.
5.52. Leachate concentration ratio for bentonite stabilized fly ash matrices at OMCdry. 136

5.53. Leachate concentration ratio for bentonite stabilized fly ash matrices at OMC. 136

5.54. Leachate concentration ratio for cement stabilized fly ash matrices at OMCdry. 137

5.55. Leachate concentration ratio for cement stabilized fly ash matrices at OMC. 137

5.56. Leachate concentration ratio for bentonite-cement stabilized fly ash matrices at OMCdry. 138

5.57. Leachate concentration ratio for bentonite-cement stabilized fly ash matrices at OMC. 138

6.1. Leachate load ratio for different stabilized fly ash matrices at OMCdry. 142

6.2. Leachate load ratio for different stabilized fly ash matrices at OMC. 143
