Acknowledgement

The author is extremely thankful to his beloved Guide, Dr.P.Govindan, Assistant Professor in Civil Engineering, for suggesting this topic and his remarkable guidance and assistance throughout this work. Without his deep involvement, frequent consultations and inspired discussions, this work would not have taken shape.

He expresses his deep gratitude to Dr.M.Guruswamy, Principal, for granting him permission and providing very excellent facilities for carrying out this work. He deems it a pleasure to place it on record his immense gratitude to his Head of the Department, Prof.R.Krishnamoorthy for his deep involvement in this work and his kind cooperation. He also expresses his grateful feeling to the previous Head, Dr.V.G.Pandarinathan, for all his assistance.

The author places on record his sincere appreciation and thankful feeling for all the kindness, consideration and cooperation shown to him by Prof.A.A.Natarajan, who is in charge of Structural Engineering Laboratory, where the work has been carried out. He wants to record his sincere appreciation to Dr.M.Inbasakaran for all his assistance in the theoretical analysis. He should feel very ungrateful if he forgets to express his sincere thanks to Dr.A.Sethurathnam for all his kindness and help. The moral support and constant encouragement given by Sri.K.Jayaraman made the author fulfil his cherished wish of completing the programme. The indebtedness of the author to him is ineffable. The author is very much thankful to Dr.S.DuraiSwamy for all his helps towards the realization of this thesis.

The author is immensely grateful to Dr.A.R.Santhakumar, Dean, Academic Research, College of Engineering, Anna University, Madras, for his thought-provoking suggestions, critical comments and his uniform benevolence.

The various helps rendered by all the members of the Civil Engineering faculty and other departments during the course of this work are very gratefully acknowledged.
The author could not find proper words to express his feeling to describe the unstinted cooperation and ungrudging participation rendered by Sri. B. Selvakoodalingam at various stages of this work. The help rendered by M/S. K. Namperiar and K. Sekar during experimental work is very gratefully acknowledged. The author wishes to cordially thank M/S. P. Vinayagam, M. Jagadeesan, C. Ganesh and C. Sathiyamoorthy for their willing assistance and cooperation.

His grateful acknowledgements are profoundly due to the laboratory staff Mr. G. Athimullah and Mrs. K. K. Rajalakshmi for all their immense assistance and support.

He is very much thankful to Prof. L. Srinivasan and Dr. N. Govindasamy for their help in completing this thesis work. He wants to place in black and white his debt of gratitude to Sri. G. V. Dhanushkoti, Sri. A. Swaminathan, and Sri. M. K. Natarajan for their benign cooperation and his thanks are due to all the office and workshop staff.

The Management of Coimbatore Institute of Technology, Coimbatore and the Ministry of Human Resources Development, New Delhi are to be particularly thanked for providing all the facilities, financial and otherwise, in carrying out this work.

And last, and by no means the least, the ineffable understanding, patience, love and support shown by his father Sri. A. Easwara Pillai, mother Smt. E. Kamalam, wife Sujatha and daughters Nisha and Abinaya, during those days in which he scarcely found time to bestow any attention to them, are most gratefully inscribed in his heart.
