CHAPTER 1: INTRODUCTION	1
1.1 Overview of Information Theory	1
1.2 Basics of Information Theory	2
1.2.1 Shannon Entropy	2
1.2.2 Generalized Information Measures	4
1.2.2.1 Entropies of Order α and Order (α, β)	4
1.2.2.2 Entropy of Degree α and Degree (α, β)	4
1.2.7.3 Entropy of kind t	5
1.2.7.4 Entropies of Order 1 and Degree β and Order α and Degree β	5
1.2.3 Relative Information and Inaccuracy	6
1.2.4 Divergence Measures	6
1.2.5 Weighted Entropies and their Generalization	7
1.2.6 Characterizations of Generalized Entropies	9
1.2.6.1 Entropy of Order α	9
1.2.6.2 Entropy of Degree β	10
1.2.6.3 Entropy of Degree (α, β)	10
1.2.6.4 Entropy of Kind t	11
1.2.6.5 Entropy of Order α and Degree β	13
1.2.7 Coding Theory	14
1.2.8 Inequalities	15
1.2.7.1 Shannon's Inequality	15
1.2.7.2 Jensen's Inequality	15
1.2.7.3 Holder's Inequality	16
1.2.7.4 General Inequality	16
1.3 Survey of Literature	16

CHAPTER 2: AXIOMATIC CHARACTERIZATION OF ENTROPY

	OF TYPE (α, β, γ)	19
2.1	Introduction	19
2.2	Set of Axioms	22
2.3	Properties of Entropy of Type (α, β, γ)	27
2.4	Triparametric self information function and entropy	31
2.5	Triparametric Entropy	32
2.6	Some Familiar Entropies	33
2.7	Application of triparametric entropy	33
	2.7.1 Joint Entropy	33
	2.7.2 Triparametric Information Function	35
	2.7.3 Generalized information Function	35
	2.7.3.1 Boundary conditions	35
	2.7.3.2 Generalized Inaccuracy	36
	2.7.3.3 Information Deviations	37
	2.7.3.4 Kullback's Information and Its Generalizations	37
	2.7.3.5 Generalized Boundary Conditions	38
2.8	Conclusions	39

CHAPTER 3: ON 'USEFUL' RELATIVE INFORMATION MEASURES

	OF ORDER α AND TYPE β	40
3.1	Introduction	40
3.2	A Generalized Measure of 'Useful' Relative Information	41
3.3	Special Cases	46
3.4	Measure of 'Useful' Information	48
3.5	Relationship Between Measure of Entropy and Directed Divergence	53
	3.5.1 Behra and Chawla's Measure	53
	3.5.2 Kapur's Measure	54
3.6	Conclusions	56

CHAPTER 4: ON 'USEFUL' R-NORM RELATIVE INFORMATION

	AND J-DIVERGENCE MEASURES	57
4.1	Introduction	57

4.2	Some Requisite Results	58
4.3	A Generalized Measure of ‘Useful’ R-norm Relative Information	61
4.4	Special Cases	63
4.5	Measure of ‘Useful’ Information	64
4.6	Measure of Useful j-Divergence of Type β	67
4.7	Conclusions	69
CHAPTER 5: SOME CODING THEOREMS FOR NON-ADDITIVE GENERALIZED MEAN-VALUE ENTROPIES		70
5.1	Introduction	70
5.2	Non-additive measure of code length	71
5.3	Characterization of Non-additive Measures of Code Length	73
5.3.1	Limiting and Particular Cases	77
5.4	Conclusions	79
CHAPTER 6: CHARACTERIZATION OF NONADDITIVE MEASURES OF AVERAGE CHARGE WITH ONE AND TWO PARAMETERS		80
6.1	Introduction	80
6.2	Notations and Definitions	81
6.3	Characterization of Non-Additive Measures of Average Charge with One Parameter.	84
6.3.1	Limiting and Particular Cases	89
6.4	Characterization of Non-Additive Measures of Average Charge with Two Parameters	91
6.4.1	Limiting and Particular Cases	95
6.5	Conclusions	97
BIBLIOGRAPHY		98
