ACKNOWLEDGEMENTS.

It gives me immense pleasure to express my deep sense of gratitude in obedience with respect and sincere thanks to my guide, Prof. S. Sankar Naik, Head & Chairman (BOS), Department of Sericulture, Sri Krishnadevaraya University, Anantapuramu for his valuable guidance, constant encouragement, help and support extended during the course of the study which made the thesis possible in its present form.

I am highly thankful to Sri. B. Satyanarayana, Assistant Professor, Department of Sericulture, Sri Krishnadevaraya University, Anantapuramu for his good support extended during the course of my study. My thanks are definitely due to Dr. P. L. N. Reddy and Dr. B. Sujata, Department of Sericulture for their support and encouragement.

I also express my sincere thanks to Mr. P. Venkatesulu and Mr. A. K. Venkatesh, Assistant personnel of the Department of Sericulture, Sri Krishnadevaraya University, Anantapuramu who helped me in survey work of the project in the field.

I express my deep sense of gratitude to Dr. N. Sivarami Reddy, Scientist-D (Retd.), Regional Sericultural Research Station, Central Silk Board, Anantapuramu for his critical review of the manuscript, constant guidance, encouragement and personal involvement at each and every step in bringing thesis in to the present form. I owe to him for giving me strong support to face all challenges and adversities during the course of my study.

The research work of this thesis has been carried out with financial support from the University Grants Commission (UGC) through a Basic Science Research (BSR) Fellowship (UGC Lr. No. F. 4-1/2008 (BSR)/August/2009 (BSR). The researcher gratefully acknowledges the support from UGC.

(B. Vinayak Reddy)
