ACKNOWLEDGEMENT

Every Research Scholar knows by his experience that work of this magnitude cannot be satisfactorily and successfully completed without help and cooperation of several individuals, institutes and academies.

At the very onset I must express my deep sense of gratitude to my research guide, Dr. A. K. KHAN, Lecturer, Dept. of Zoology for suggesting the present problem and for his constant help and encouragement during the progress of this work. His nobility and brotherly affection always encouraged, whenever the task seemed impossible.

I am grateful to Dr. (Mrs) Sarojini. R. Nagabhushanam, Prof department of Zoology for her crisp comments, constructive suggestions and constant encouragement given to me so frequently during the complete tenure of this investigation.

My profound thanks are due to Dr. R. Nagabhushanam, Prof and Head, Dept. of Zoology, Marathwada University for providing all necessary facilities during the first half period of investigation. He was always ready to solve any of my problems from the beginning to the end of the research work.

I am grateful to Dr. V. S. Lomte, Prof and Head, Dept of Environmental Science for providing all necessary facilities during the second half period of my research work.

I am indebted to Dr. U. H. Mane for his unfailing and unreserved help and encouragement throughout the period of this work.

My sincere thanks are due to Dr. Masood Ahmed who help me with useful suggestions and books.

I am also grateful to Dr. (Mrs) Sumwanshi, Dr. Smt. Khot for their general assistance.
My heartful thanks are due to Dr. (Miss) Qumerunnisa for their continuous encouragement throughout my thesis work. I extend my gratitude to my colleague Mrs. R. T. Patel for her kind cooperation and help to complete this work.

I am deeply indebted to shri Ehetasham Baig, shri Khayyam Baig and shri Quazi Anwar for sparing their valuable time and putting their energy for making available computerised results of the data analysis, charts and graphs which made possible presentation of the thesis in a very neat, sophisticated, scientific, most accurate manner. My grateful thanks to Shri. Jawad, Hussaini Zafar and Kazi Akhtar for the typing work done expeditiously.

It is beyond my reach to find proper expression to my feeling towards my relatives particularly my uncles and aunts, both paternal and maternal for which I am obliged to them.

I owe a sense of gratitude to my sisters (especially to Yasmeen) and grand mother for their immense patience, encouragement and understanding during the period of my study.

Finally I must express my heart warm feeling towards my father whose patience and perseverance from the beginning to the end of this work could see the light of the day. His liberal outlook and high ethical values played a very important role in my life.

I will be doing injustice to my friends and departmental colleagues, if I don’t thank them for their cooperation. My circle of friendship is very vast hence I am not mentioning their names. Hope they will appreciate this fact.
