Acknowledgements

The author is deeply indebted to Prof. S Rajasekaran, Head, Department of Civil Engineering, for the motivation and creative and expert guidance, provided throughout the course of this research work. The author also expresses her gratitude, for the inspiration and intellectual support provided by him, in all her research pursuits.

The author expresses her sincere thanks to the Management of PSG College of Technology and to Prof. P Radhakrishnan, Principal, for the encouragement and for providing the necessary facilities to carryout this research work.

The author owes much to Dr J V Ramasamy and Dr G Sankarasubramanian for their suggestions, advice and constructive comments and to her colleagues and graduate students of the Department of Civil Engineering, for their support and assistance rendered in completing this work.

The author takes pleasure in thanking Prof. G V Krishna Reddy, Dean, PSG Center for Non-formal & Continuing Education, Prof. R Nadarajan, Head, Department of Mathematics & Computer Applications and all her colleagues in the Department of Mathematics & Computer Applications for their helpful suggestions and advice.

The author acknowledges with thanks the efficient services rendered by M/s. Infotek Computer Services, Coimbatore, in printing the manuscript, and Mr. M Solaiappan, for tracing the drawings.

Finally, the author while dedicating any fruitful outcome of this work to the memory of her father would like to place on record the support and encouragement provided by her mother and sisters in the successful execution and completion of this work.
